Dear Sir / Madam,

**Consultation - Statutory Undertakers : Electricity Act 1989: Overhead Lines (Exemption) (England and Wales) Regulations 2009 UK Power Networks (UKPN) - upgrade the existing overhead line by increasing the number of conductors from two to three, and replacing the existing poles.
Greys Farm, Therfield Road, Royston, Hertfordshire, SG8 9NW**

I am writing in relation to the document received on 9th May 2025 outlining the UK Power Networks proposal to upgrade the overhead electricity line near Greys Farm, Therfield. The works will add a third conductor line to the existing and replace the existing poles.

I understand that the document is a notification only, and is not a request for pre-application advice, a planning application, or a request for a certificate of lawfulness. The form however states that the LPA should confirm whether an environmental impact assessment should be undertaken.

The Local Planning Authority acknowledge your intention to carry out works to the site.

Having considered the information provided, the Local Planning Authority raise no objections to the proposed works. However, please note that this is not a formal decision of the Council and it is recommended that you apply for a certificate of lawfulness if you would like a formal decision

Yours faithfully

Shaun Greaves
Development and Conservation Manager
