Heritage Statement for alterations to gate at 9 High Street, Barkway.

The proposal is to improve the access to the rear garden and to replace the existing fence/gate with a pair of quality timber gates.

The client finds the present access a problem due to the step and may have to leave the rubbish bins outside the house in the street. The proposal is to remove the step and have gates at the same top level but go down to the existing street level thus providing a shallow ramp to the garden.

The gate posts are at present fixed to listed buildings on each side and will remain untouched.
