

An architectural elevation drawing of a house. The house features a gabled roof with a chimney on the right side. The main body of the house is covered in a brick pattern. There are two windows: a small, narrow, vertical window on the upper part of the main wall and a larger, rectangular window on the lower part of the main wall. To the left of the main house is a smaller, single-story extension, also with a brick pattern, featuring a door with a small window. A shadow is cast by the main house onto the ground. The ground is represented by a solid grey area at the bottom.

An architectural line drawing of a two-story house. The main structure has a gabled roof with a chimney on the left side. The walls are filled with diagonal hatching. To the right, there is a single-story extension with a brick wall texture and a door with vertical bars. A small window is visible on the left side of the main house. The drawing is set against a plain white background with a grey ground line at the bottom.

This architectural elevation drawing shows a two-story building with a brick facade. The roof is made of corrugated metal and features a chimney on the left side. The building has several windows: a large double door at the ground level, a double window above it, and two more double windows on the upper floor. A small addition on the right side has a single window. The drawing includes dashed lines indicating level markers and a vertical line for a structural break.
