"Somerton House" 47 High Street, Barkway

Proposed alterations

The proposal is to lower the floor of the Morning Room by 150mm and to seal off the existing door from the inside to allow wall units as part of the re-fitting as the kitchen.

The floor is to be lowered because at present there is inadequate headroom for the owner of the house.

There is at present two steps up to the room, these will be modified to one step up. The outside ground level is 300mm below the existing floor, this will be reduced to 150mm and will not create any problems.
