Dear Mr Glover
Thank you for your letter of 19th March 2018 re the proposed extension at 79 Millstream Close, next door to me and indeed adjoining my home, no 80.

I have no objection in principle to this BUT I would appreciate clarification about the foundations and an assurance that my house will not be endangered at all.

As you no doubt realise, the land here is 'brown field'. I believe this used to be the County Council highways depot. We are also very close to a river. There has been at least one instance of a sink hole (it was on my land which is how I know about it).

I am concerned about the standard of the footings and foundations. I need to be certain that the extension will be totally stable and that there is no danger of any part of it sinking at all and damaging any part of my wall with it.

I do not know what sort of foundations were used for the existing extension. That was, of course, of less concern as it is single storey.

I also remain concerned about the drainage and sewerage system as I said when responding to the application to build the single storey extension. So far, there have been no problems but the further extension could perhaps cause a problem. I am, of course, no expert!

Those are my representations. I hope an email is sufficient but I can put this in a printed letter if need be.

Yours sincerely
Judy Howlett

Hard copy of my email.

I'd appreciate an acknowledgement (by email is fine).
