DISCHARGE OF PLANNING CONDITIONS 7 c & d AND CONDITION 10

Condition 7 c & d
Refers to the installation of a vapour protection membrane below the slab of the new building. David Carr, Environmental Health Protection Officer for North Hertfordshire District Council, clarified the requirements for the membrane in a series of emails with James Nelson of Discovery CE Ltd in December 2017. The validation report for the gas membrane is submitted with this application.

Condition 10
As no widespread remediation was deemed necessary we understand that North Hertfordshire District Council will accept the gas membrane verification report submitted with this application as sufficient evidence to discharge condition 10.

We therefore believe that acceptance of the submitted gas membrane verification report will discharge conditions 7 c & d and condition 10.
