Bus Shelter to be 2 Bay Centurion Shelter by Clear Channel

A modern design allowing for a light and airy feel, constructed from aluminium with steel inserts, the Centurion enhances the streetscape without distracting from its environment. It has a low barrel vaulted roof with options including half or full end panels. The shelter can be provided as, fully enclosed, 3 sided or as a cantilever option. The shelter is available in increments of 1366mm. Features include provision for RTI, illumination, seating, information panels, CCTV and midrails. Shelter is finished in a powder coat in any RAL colour.
