

Quotation

Dated: 2nd August 2024

Customer Address:

Paul Owen
19 Lucas Lane
Ashwell
Baldock
SG7 5LN

For: Multiple Tree Works with Green Waste Processing

Item	Description of Work
T1	The 45-feet-tall Beech (Fagus Sylvatica) tree (approx.) growing in the back of the rear garden to undergo a crown reduction and thinning to around 30-feet to match the height of the Willow in the neighbouring garden. The lowest limb to be removed. Through pruning, dead wooding, thinning and overall reduction the crown will be opened up to leave the tree healthy and balanced with a long-lasting shape fit for the habitat. The work will also create more light into the garden to allow other planting to thrive.
T2 Group T3	The five 33-feet-tall Leyland Cypress (x Cuprocyparis Leylandii) growing up into the Beech and Ash trees to be safely and systematically dismantled down to low stumps. A further smaller Leyland Cypress (x Cuprocyparis Leylandii) to also be dismantled down to a low stump.
	Option Stump Grinding of all stumps.
