### Distribution

This report has been prepared for the exclusive use of **BLUECREST LAND (1) LTD**. It should not be reproduced in whole or in part, or relied upon by third parties, without the express written authority of Ardent Consulting Engineers.

## **1. Introduction**

- 1.1. Ardent Consulting Engineers (ACE) has been appointed by Bluecrest Land (1) Ltd to advise on transport and infrastructure aspects of the proposed residential development at Land West of Tuthill House, Kelshall Tops, Therfield, Hertfordshire (hereafter known as 'the site').

### **Scope**

- 1.2. This Transport Statement (TS) has been prepared to accompany a full planning application for the erection of 3 dwellings and associated amenity, parking and landscaping.
- 1.3. The planning application for the proposed scheme is submitted to North Hertfordshire District Council (NHDC) as the local planning authority. Hertfordshire County Council (HCC) is the local highway authority responsible for roads in the village and surrounding area.
- 1.4. This submission follows refusal of a previous application for 3 no. residential units (planning application ref. 21/03533/FP). The application was refused in February 2023 and dismissed at appeal in February 2024 (ref. APP/X1925/W/23/3324095). In response to the refusal, the applicant is seeking permission by making amendments that are believed to address the Inspector's comments.
- 1.5. No technical objection was raised by NHDC or HCC in respect of transport for the previous scheme at the application stage. Likewise, the Inspector found that the site access point and the site's location for housing were suitable and sustainable.
- 1.6. This TS has been prepared in accordance with guidance set out in the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG) documents.

### **Structure of TS**

- 1.7. Following this introduction, the remainder of this report is structured as follows:

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

- **Section 2** considers the existing situation, including proximity of the site to local services, pedestrian and cycle facilities and accessibility by public transport;
- **Section 3** outlines the proposed development scheme, including access and parking arrangements;
- **Section 4** considers the land use and transport planning policy context for new residential development proposals and highlights how the scheme complies;
- **Section 5** sets out the predicted trip generation for the proposed development; and
- **Section 6** provides a summary and sets out the conclusions.

## **2. Existing Situation**

### **Site Location & Local Context**

- 2.1. The application site is located on the north-western edge of Therfield, situated on the southern side of Kelshall Tops. Therfield is a small village located approximately three miles south-west of Royston and six miles north-east of Baldock.
- 2.2. An aerial view of the site in its immediate context is shown at **Figure 2.1** below with the indicative site boundary outlined in red.

**Figure 2.1: Aerial View of Site (Source: Google Maps)**

- 2.3. The site boundary is formed by Kelshall Tops to the north, residential properties accessed from Tuthill Court to the east and agricultural fields / open space to the south and west.
- 2.4. Given the site's location on the outskirts of Therfield, the local land use environment is mixed. This being principally formed of residential properties, agricultural fields

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

and open space. Education and leisure facilities can also be found in close proximity to the site.

**Existing Use**

- 2.5. The overall site comprises an area of 0.79 hectares and comprises of Tuthill's Yard. The site was granted planning consent in 1992, under ref. 92/00143/1, for the open storage of agricultural machinery and as an operating depot for four heavy goods vehicles by the owner of the site.
- 2.6. The site is completely covered with concrete hard-standing and has a tall communications mast located within the eastern corner.
- 2.7. There are two Public Right of Way (PROW) footpaths that run along the eastern and western boundaries of the site. Both footpaths (THERFIELD 014 and THERFIELD 034) begin on Kelshall Tops and provide connections east towards the centre of Therfield to local amenities and bus stops and southbound towards Kelshall.

**Access**

- 2.8. Vehicular access and egress to the site is currently available from one point, taken along the site's northern frontage from Kelshall Tops.
- 2.9. The gated access point comprises a wide priority T-junction arrangement suitable to cater for the HGV turning movements that the extant site use attracts. The entrance measures approximately 6m wide and is set back approximately 9m from the edge of the carriageway.
- 2.10. The general condition and characteristics of the existing access point are shown in **Figure 2.2** overleaf.

**Figure 2.2: Existing Vehicular Access / Egress Point from Kelshall Tops  
(Source: Google Maps)**

### **Local Highway Network**

- 2.11. Kelshall Tops runs along the northern site boundary as a single carriageway two-way road, approximately 5 – 6m wide.
- 2.12. To the east of the site, the carriageway is subject to a 30mph speed limit as it enters the village of Therfield. To the west, the speed limit changes to the national speed limit (60mph).
- 2.13. The typical highway conditions and characteristics of Kelshall Tops adjacent to the site are shown in **Figure 2.3** overleaf.

**Figure 2.3: Kelshall Tops (Source: Google Maps)**

- 2.14. Direct residential accesses are provided from the southern side of the carriageway and are formed by driveways allowing for on-plot car parking.
- 2.15. At the eastern end of Kelshall Tops, the road connects to The Causeway and Mill Lane at a priority staggered junction arrangement where The Causeway is the major road. The Causeway is a single carriageway road that provides access to Therfield First School and a number of leisure facilities within the village.
- 2.16. Pedlars Lane connects to Kelshall Tops circa 170m east of the site and provides a connection to the village green and The Causeway.
- 2.17. At the western end of Kelshall Tops, the carriageway becomes Therfield Road and continues westbound to connect with the A505 Baldock Road.

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

**Wider Highway Network**

- 2.18. The A505 is located to the west of the site, accessed directly from Therfield Road. It provides a strategic connection between Bedfordshire and Cambridgeshire, with links to Leighton Buzzard, Dunstable, Luton, Hitchin, Baldock, Royston and Duxford.
- 2.19. The A10 is located to the east of Therfield, providing a strategic connection between Central London and King's Lynn with links to Bishopsgate, Shoreditch, Tottenham, Buntingford, Waltham Cross, Thundridge, Buntingford, Chipping, Royston, Cambridge and Milton.
- 2.20. In conclusion, the site has good access to the immediate and wider highway network, providing access to local centres and facilities.

**Traffic Surveys**

- 2.21. A set of Automatic Traffic Count (ATC) surveys were undertaken in November 2019 as part of the previous application (planning application ref. 21/03533/FP), to determine existing volumes and speeds of traffic in the local area.
- 2.22. The surveys were undertaken for seven consecutive days during a neutral period, outside of school or public holidays. The surveys recorded speeds and vehicle classifications at the end of each hour.
- 2.23. The following locations were recorded as shown on **Figure 2.4** overleaf, with the indicative site boundary outlined in red.

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

**Figure 2.4: ATC Locations on Kelshall Tops (Source: Google Maps)**

2.24. A summary of the speeds and volumes in each direction is provided in **Table 2.1** below.

**Table 2.1: Surveyed Vehicle Speeds and Volumes**

| ATC Location                                       | Direction | Average Speed (mph) | 85th Percentile Speed (mph) | Average Peak Hour AM Volume (08:00 – 09:00) (vehicles) | Average Peak Hour PM Volume (1700 – 1800) (vehicles) |
|----------------------------------------------------|-----------|---------------------|-----------------------------|--------------------------------------------------------|------------------------------------------------------|
| <b>ATC 1</b><br>Western of access on Kelshall Tops | Westbound | 32.1                | 37.7                        | 32                                                     | 31                                                   |
|                                                    | Eastbound | 31.6                | 37.3                        | 40                                                     | 24                                                   |
| <b>ATC 2</b><br>Eastern of access on Kelshall Tops | Westbound | 31.3                | 36.7                        | 32                                                     | 30                                                   |
|                                                    | Eastbound | 28.6                | 33.9                        | 40                                                     | 24                                                   |

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

2.25. The recorded traffic surveys are provided at **Appendix A**.

2.26. The recorded vehicle speeds have been used in order to calculate junction visibility splay requirements for the proposed access point to the scheme. These are explained in further detail within **Section 3**.

2.27. It should be noted that the traffic surveys were undertaken prior to the COVID-19 pandemic. The survey data is therefore considered robust due to the significant increase in homeworking and the likely resultant reduction in public transport use.

2.28. In order to ensure that the surveys are acceptable, additional surveys were undertaken in July 2024.

2.29. The results are provided at **Appendix B** and are summarised in **Table 2.2**.

**Table 2.2: Surveyed Vehicle Speeds and Volumes**

| <b>ATC Location</b>                                | <b>Direction</b> | <b>Average Speed (mph)</b> | <b>85th Percentile Speed (mph)</b> | <b>Average Peak Hour AM Volume (08:00 – 09:00) (vehicles)</b> | <b>Average Peak Hour PM Volume (1700 – 1800) (vehicles)</b> |
|----------------------------------------------------|------------------|----------------------------|------------------------------------|---------------------------------------------------------------|-------------------------------------------------------------|
| <b>ATC 1</b><br>Western of access on Kelshall Tops | Westbound        | 32.0                       | 37.7                               | 34                                                            | 26                                                          |
|                                                    | Eastbound        | 29.6                       | 34.9                               | 25                                                            | 35                                                          |
| <b>ATC 2</b><br>Eastern of access on Kelshall Tops | Westbound        | 26.2                       | 31.4                               | 34                                                            | 29                                                          |
|                                                    | Eastbound        | 26.2                       | 31.5                               | 28                                                            | 37                                                          |

2.30. The results shown are close to those recorded in 2019, indicating that traffic conditions have not changed dramatically in the area.

2.31. Given the recorded speeds approaching the proposed access point are slightly higher in the 2019 surveys (and that the design of the access was previously considered acceptable to HCC Highways) the higher recorded speeds from 2019 have been re-used for the site access point in the current proposals in order to be robust.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

**Accident Data**

- 2.32. The NPPG includes general advice on the scope of Transport Statements and Assessments. This document states that consideration should be given to '*an analysis of the injury accident records on the public highway in the vicinity of the site access for the most recent 3-year period, or 5-year period if the proposed site has been identified as within a high accident area*'.
- 2.33. In light of the above, the crashmap.co.uk website has been reviewed for the immediate area adjacent to the site to understand the general accident traits of the immediate highway network.
- 2.34. There have been no recorded accidents on the immediate highway network for the 3-year period spanning 2020 – 2022 (inclusive). Even on review of 10-years' worth of data, no accidents have occurred.
- 2.35. In summary, it is concluded that there are no existing highway safety issues locally or any accident clusters. The data shows that the local area does not suffer an accident problem, this includes within the timeframe the site was operational and attracting HGV or agricultural machinery movements.
- 2.36. The proposals are expected to have a negligible impact on highways safety and traffic congestion.

**Local Amenities and Facilities**

- 2.37. The site is located on the western edge of the village of Therfield, between the towns of Royston and Baldock. Its surrounding area is predominantly residential and agricultural.
- 2.38. The Chartered Institution of Highways and Transportation (CIHT) document 'Providing for Journeys on Foot' recommends suggested acceptable walking distances of between 400m ("Desirable") for general journeys and 2km ("Preferred Maximum") for commuting and journeys to school purposes.
- 2.39. Manual for Streets (MfS) identifies walkable neighbourhoods as being those typically characterised by having a range of facilities within an 800m (10-minute) walk

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

distance, however not an upper limit, with walking offering the greatest potential to replace short car trips, particularly those under 2km.

2.40. Facilities within acceptable walking distances from the application site include:

- Leisure facilities (The Fox & Duck Pub, Therfield Park and Therfield Cricket Club);
- Education facilities (Therfield First School and Therfield Pre-School); and
- Places of Worship (Therfield Chapel and Church of Saint Mary the Virgin).

2.41. The range of online shopping services now offered by major retailers means that residents can order groceries and other goods online and have these delivered. This reduces the need for residents to travel for their day-to-day needs and for casual shopping.

**Walking and Cycling**

2.42. There are no footways on Kelshall Tops and limited footway provision within the village as a whole, which is entirely typical of a village setting.

2.43. The ATC data referred to above shows that Kelshall Tops is lightly trafficked, with weekday peak hour vehicle flows of between 62 and 64 two-way movements, and so around one movement every minute in the 'worst case' weekday peak hours. The recorded average mean speeds east of the access (in the direction of the village centre) were around 30mph.

2.44. Both the surveyed low traffic volumes and speeds are conducive to walking and cycling along the lane. It is also evident from the accident records that the local highway network does not have an accident problem.

2.45. A review of the PROW routes in the vicinity of the site shows that there are two PROW footpaths that run along the eastern and western boundaries of the site. Both footpaths (THERFIELD 014 and THERFIELD 034) begin on Kelshall Tops and provide connections east towards the centre of Therfield to local amenities and bus stops and southbound towards Kelshall.

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

2.46. Additionally, there are many PROW routes surrounding the site providing wider access to nearby areas and facilities. The location of these footpaths are shown within **Figure 2.5** below, with the indicative site boundary outlined in red.

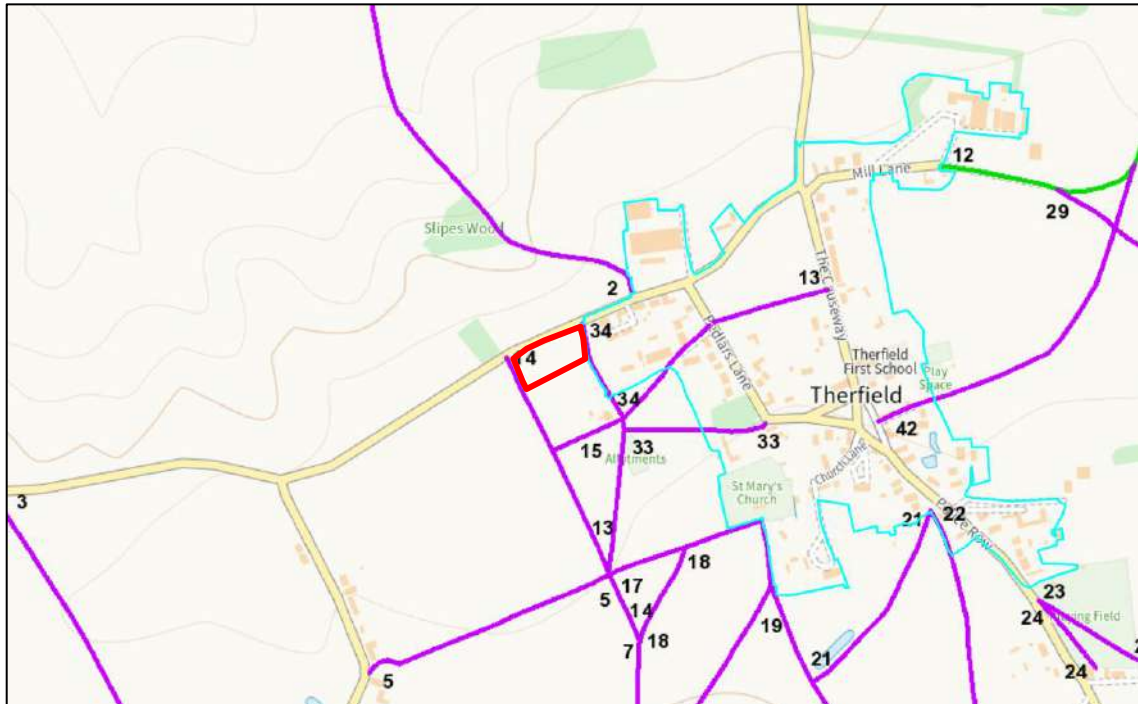

**Figure 2.5: PROW Map (Source: NHDC)**

2.47. Local Transport Note 1/20 'Cycle Infrastructure Design' (DfT, July 2020) states that *"...Two out of every three personal trips are less than five miles in length."* [Paragraph 2.2.2, page 16]. The site is well placed to reach key local destinations within 5 miles (8km) which is considered a realistic cycling distance.

2.48. An 8km isochrone catchment area centred on the site demonstrates that surrounding areas including Buntingford and Royston are all within a comfortable cycling distance. A typical cycle speed of 20km/h would result in this distance equating to a journey time of approximately 24 minutes.

**Public Transport**

2.49. Ashwell & Morden is the nearest rail station, located around 5km to the north-west of the site, around a 6-minute drive or 15-minute cycle ride away. The station is managed by Great Northern and follows the Great Northern Route between Royston and Baldock.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

- 2.50. The station provides services every 10 - 20 minutes that connect to Brighton and Cambridge.
- 2.51. Ashwell & Morden station provides a total of 12 sheltered cycle stands located by the station entrance, which gives the opportunity for residents to cycle to the station as part of a longer journey. In addition, 41 car parking spaces (including 2 accessible spaces) are also provided at this station which is open 24 hours.
- 2.52. Royston railway station is located approximately 5.8km to the north-east of the site, around a 9-minute drive or 22-minute cycle ride away. The station is managed by Great Northern and also follows the Great Northern Route.
- 2.53. The station provides more regular services (every 5 - 10 minutes) that connect to Brighton, Cambridge and London Kings Cross.
- 2.54. Royston station provides a total of 178 sheltered cycle racks located at the station entrance and car park for Platform 1, and the car park for Platform 2. In addition, 517 car parking spaces (including 9 accessible spaces) are also provided at this station which is open 24 hours. The station has step-free access to all platforms and accessible ticket machines.

**2021 Census Data**

- 2.55. Both car ownership and travel to work data has been derived from the 2021 Census for the existing resident population of the area surrounding the site (E02007088 : North Hertfordshire 016), details of which are contained in **Appendix C**.

***Car Ownership***

- 2.56. The data shows from the 2021 Census Data shows a total average car ownership level of 1.98 cars per household for all housing types in the area surrounding the site, and that 6% of local households do not own a car.

***Travel to Work***

- 2.57. The data shows the following proportions of multi-modal trips based upon the journey to work travel data.

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

**Table 2.2: Journey to Work Proportions (Source: 2021 Census Data)**

| <b>Workplace</b>                                                               | <b>2021</b> |
|--------------------------------------------------------------------------------|-------------|
| Working from Home                                                              | 49%         |
| Commuting                                                                      | 51%         |
| <b>Mode Share for Those Commuting (as a percentage of the commuting level)</b> |             |
| Train (incl. Underground)                                                      | 4.2%        |
| Bus                                                                            | 0.5%        |
| Taxi                                                                           | 0.3%        |
| Motorcycle                                                                     | 0.3%        |
| Car Driver                                                                     | 80.7%       |
| Car Passenger                                                                  | 5.2%        |
| Bicycle                                                                        | 1.4%        |
| Pedestrian                                                                     | 7.4%        |
| <b>Total</b>                                                                   | <b>100%</b> |

2.58. The 2021 Census data, whilst being the most recent, was impacted by the COVID-19 Pandemic and the results in relation to Method of Travel to Work should be treated with caution due to the significant increase in homeworking and the likely resultant reduction in public transport use. However, the pandemic has accelerated homeworking and remote working trends that have been occurring over the past decade, which are likely to be retained through hybrid working and the increase in virtual meetings going forward.

### **3. Proposed Development**

3.1. This proposed development is for 3 no. detached houses, along with associated amenity, parking and landscaping. The development is set to provide the following mix of units:

- 1 x 3-bedroom house;
- 1 x 4-bedroom house; and
- 1 x 5-bedroom house.

3.2. A full description of the proposed development scheme is contained in the supporting documents accompanying the planning application.

3.3. A copy of the proposed site plan is provided at **Appendix D**.

3.4. The following description is pertinent to the highways and transport aspects of the proposed development scheme.

#### **Access**

3.5. Vehicular access / egress to the development is proposed to be retained from the existing access point, albeit amended to suit its residential use. The change in site use is not expected to intensify the use of the junction and as a result the access point is considered appropriate.

3.6. The site access has no existing accident record, and the proposals are not expected to increase the level of traffic entering or leaving the site.

3.7. The access road is proposed to comprise a 4.8m wide private driveway internally of the site.

3.8. Visibility splays at the access points have been calculated based upon the recorded 85<sup>th</sup> percentile speeds from the ATCs on Kelshall Tops (as set out in **Section 2**). The required visibility splays for the site access have been calculated as follows:

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

- To the right (east) 2.4m x 57m (in accordance with an 85th percentile speed of 36.7mph using MfS standards) and
- To the left (west) 2.4m x 59m (in accordance with an 85th percentile speed of 37.3mph using MfS standards).

3.9. A plan of the site access and the required visibility splays, as detailed above, is provided on **ACE Drawing 196661-001**. This shows that suitable junction visibility is achievable to standards.

3.10. Cars are able to park and manoeuvre internally of the site, thereby being able to access and egress the site in forward gear with a minimum of 6m clear room at the rear of any perpendicular parking spaces.

3.11. It is proposed to provide a 2m wide pedestrian link at the eastern boundary of the site, to provide a direct connection to PROW footway no. 34. This route will provide a route towards local amenities and bus stops within the village centre for pedestrians.

**Parking**

3.12. Parking is to be provided in accordance with the NHDC Vehicle Parking at New Developments Supplementary Planning Document (September 2011) for all units.

3.13. The standards requires a minimum of 2 spaces per 2+ bedroom dwelling to be provided on-site.

3.14. Based on the above guidance, this would equate to a minimum requirement of 6 car parking spaces to be provided for the 3 dwellings. This level of parking has been met.

3.15. The standards also require visitor / unallocated parking to be provided as a minimum of 0.25 spaces per dwelling. The central courtyard which serves all 3 dwellings has been designed to create an informal parking arrangement for visitors.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

3.16. Cycle parking will also be provided in accordance with the NHDC 2011 standards. All the housing plots are to have cycling spaces provided within the curtilage of the property.

**Servicing and Emergency Access**

3.17. Refuse is to be collected from Kelshall Tops, with a refuse vehicle able to stop along the site frontage. A bin collection point is to be provided within a 10m distance of the position a refuse vehicle would stop at.

3.18. This approach has previously been discussed with both Hertfordshire Highways and NHDC to confirm acceptability of this. The site access point visibility splays are provided to full standards appropriate to the recorded vehicle speeds of Kelshall Tops, and as a result, a waiting refuse vehicle will have good forward visibility of on-coming traffic and vice versa. Although situated within a derestricted section of road, the recorded vehicle speeds were substantially lower than the posted speed limit.

3.19. Emergency vehicles are able to enter the site and get within 45m of dwellings (houses). Fire tenders entering the site are able to turn internally and not have to reverse beyond a 20m distance.

3.20. The AutoTrack vehicle swept path assessment shown on **ACE Drawing 196661-001** demonstrates that appropriate access and egress movements can be undertaken by a fire tender.

## **4. Policy Context**

### **Framework**

4.1. Relevant policy guidance on transport and land use planning relating to new development is set out in the following documents: -

- National Planning Policy Framework (NPPF – December 2023); and
- North Hertfordshire Local Plan 2011-2031.

### ***National Planning Policy Framework (December 2023)***

4.2. The NPPF (December 2023) sets out the Government's planning policy for England and how these should be applied. It provides a framework within which local planning policies should be produced and is a material consideration in planning decisions.

4.3. With regards to transport, the NPPF states (paragraph 108) that: '*Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:*

- a) the potential impacts of development on transport networks can be addressed;*
- b) opportunities from existing or proposed transport infrastructure, and changing transport technology and usage, are realised – for example in relation to the scale, location or density of development that can be accommodated;*
- c) opportunities to promote walking, cycling and public transport use are identified and pursued;*
- d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and*

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

*e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes and contribute to making high quality places.'*

4.4. Paragraph 109 states that: *'...opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making.'*

4.5. Paragraph 114 states that: *'In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:*

*a) appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location;*

*b) safe and suitable access to the site can be achieved for all users;*

*c) the design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Model Design Code; and*

*d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree.'*

4.6. Paragraph 115 states that: *'Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.'*

4.7. Paragraph 117 goes on to states that: *'All developments that will generate significant amounts of movement should be required to provide a travel plan, and the application should be supported by a transport statement or transport assessment so that the likely impacts of the proposal can be assessed'.*

***North Hertfordshire Local Plan 2011-2031***

4.8. The North Hertfordshire Local Plan 2011-2031 was adopted in November 2022 and replaces the saved policies of the District Plan.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

4.9. The Local Plan sets out the long term vision for the district over the period 2011 to 2031. It outlines the Council's strategic priorities and sets out a spatial strategy and supporting policies for achieving this vision.

4.10. **Policy T1: Assessment of Transport Matters** states that: '*Planning permission will be granted provided that:*

- a) Development would not lead to highway safety problems or cause unacceptable impacts upon the highway network;*
- b) Mechanisms to secure any necessary sustainable transport measures and / or improvements to the existing highway network are secured in accordance with Policy SP7;*
- c) Suitable Transport Statements, Transport Assessments and / or Travel Plans along with supporting documents are provided where required; and*
- d) For major developments, applicants demonstrate (as far as is practicable) how:*
  - i. the proposed scheme would be served by public transport;*
  - ii. safe, direct and convenient routes for pedestrians and cyclists will be provided; and*
  - iii. comprehensive integration into the existing pedestrian and cycle, public transport and road networks will be secured.'*

4.11. The Local Plan identifies that '*development proposals, we will generally be guided by the advice and responses of Hertfordshire County Council as the local highway authority who assess the impacts of development proposals on behalf of the Council as a Statutory Consultee to the planning process. The County Council support the use of Transport Statements, Assessments and supporting documents in order to do this. These reports also guide requirements within the development site.'*

4.12. **Policy T2: Parking** requires planning permission to be granted provided that:

- a) 'Parking for residential development is provided in accordance with the minimum standards set out in Appendix 4 of this Plan;*

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

- b) Parking for non-residential development is provided having regard to the standards for non-residential development set out in the relevant Supplementary Planning Document;*
- c) Proposals have regard to relevant Supplementary Planning Documents, strategies or advice and;*
- d) Applicants clearly identify how they provide for all likely types of parking demand and demonstrate that parking will be safe and of a design and layout that will function satisfactorily.'*

**Compliance**

- 4.13. For the purposes of understanding sustainability in access and transport terms, the NPPF clearly distinguishes between housing in urban and rural areas. As above, it recognises that: *"opportunities to maximise sustainable transport solutions will vary between urban and rural areas and this should be taken into account in decision making"*. (paragraph 109).
- 4.14. The NPPF also states at paragraph 82 that: *"In rural areas, planning policies and decisions should be responsive to local circumstances and support housing developments that reflect local needs..."*. Paragraph 83 then states that: *"To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities..."*
- 4.15. NPPF paragraph 114 identifies that appropriate opportunities should be taken to promote sustainable transport modes given the type of development and its location, with safe and suitable access for all users. It goes on to state at paragraph 115 that: *"Development should only be prevented or refused on highway grounds if the residual cumulative impacts on the road network or road safety would be severe"*.
- 4.16. The sustainability credentials of the site are identified in **Section 2**. The site is within walking distance of facilities within the village, and so is a suitable site for residential development in accordance with the objectives of the NPPF, which recognises that opportunities to maximise sustainable transport solutions will vary between urban and rural areas.

**TUTHILL'S YARD, ROYSTON  
TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101  
July 2024**

4.17. The car ownership data shows a total average car ownership level of 1.98 cars per household for all housing types in the area surrounding the site, with 81% residents travelling to work by car. This is typical of a rural community, with residents likely to own cars irrespective of how close the site is to shops and other amenities / facilities. Many car trips will involve combined journeys, such as commuting, shopping and school drop-off / pick-up. In this context, and as identified above, the NPPF recognises that opportunities to maximise sustainable transport solutions vary between urban and rural areas.

4.18. In view of the above, it is clear that the principle of the proposed residential development on this site is fully compliant with current policy guidance on transport and land use planning at national, regional and local levels.

## **5. Trip Generation / Attraction**

5.1. A comparison has been made between the use of the existing site and that of the proposed development scheme.

### **Existing Site**

5.2. The existing site, as mentioned in **Section 2**, was formerly used as open storage of agricultural machinery and as an operating depot for four heavy goods vehicles by the owner of the site.

5.3. Information garnered from the site operator and associated S106 for the site use indicates that the existing / former site operations could attract various people on a daily basis between the hours of 07:00 and 18:00.

5.4. The existing / former site operations could attract a variety of vehicles, including those by HGV, which would cease under the proposals. The S106 allows for usage of the site as a depot for up to 4 HGVs.

5.5. Irrespective of the above, the existing site usage traffic levels has not been considered in the following analysis, in order to ensure robustness.

### **Proposed Use**

5.6. The TRICS database has been used to derive suitable trip rates of the proposed residential site use. The proposed weekday trip rates were selected based on sites of a similar scale and region. The following criteria was used:

- All regions excluding Greater London Ireland, Scotland and Wales;
- Edge of Town and Neighbourhood Centre locations;
- Privately Owned Houses selected;
- Trip rate based upon number of units; and
- Surveys undertaken during a weekday.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

5.7. **Table 5.1** overleaf sets out the all-person trip rates used and the resultant forecast weekday peak hour trip generation of the proposed scheme (based on traditional network peak hours).

**Table 5.1: Predicted Weekday Trip Generation of the Proposed Scheme (source: TRICS)**

| Period and Mode                             | Trip Rates |       |         | Trips (3 dwellings) |     |         |
|---------------------------------------------|------------|-------|---------|---------------------|-----|---------|
|                                             | In         | Out   | Two-Way | In                  | Out | Two-Way |
| <b>Weekday AM Peak Hour (08:00 – 09:00)</b> |            |       |         |                     |     |         |
| Person (per dwelling)                       | 0.183      | 0.671 | 0.854   | 1                   | 2   | 3       |
| <b>Weekday PM Peak Hour (17:00 – 18:00)</b> |            |       |         |                     |     |         |
| Person (per dwelling)                       | 0.481      | 0.227 | 0.708   | 1                   | 1   | 2       |

Note: any discrepancies are a result of rounding.

5.8. The TRICS outputs are provided at **Appendix E**.

5.9. The mode of travel for the site has been determined from the "Travel to Work – Resident Population" dataset provided within the 2021 Census database for the area within which the site falls (see **Appendix C** and **Table 2.2**).

5.10. The modal share has been applied to the forecast residential person trips identified at **Table 5.1**. The resulting residential trip generation by mode is shown at **Table 5.2** overleaf.

**TUTHILL'S YARD, ROYSTON**  
**TRANSPORT STATEMENT**

**196661-ACE-XX-00-RP-C-0101**  
**July 2024**

| Mode Share for Those Commuting<br>(as a percentage of the commuting level) |              | Weekday AM<br>Peak Hour<br>(08:00 – 09:00)<br><br>Two-Way | Weekday PM<br>Peak Hour<br>(17:00 – 18:00)<br><br>Two-Way |
|----------------------------------------------------------------------------|--------------|-----------------------------------------------------------|-----------------------------------------------------------|
| Train (incl. Underground)                                                  | 4.2%         | 0.1                                                       | 0.1                                                       |
| Bus                                                                        | 0.5%         | 0                                                         | 0                                                         |
| Taxi                                                                       | 0.3%         | 0                                                         | 0                                                         |
| Motorcycle                                                                 | 0.3%         | 0                                                         | 0                                                         |
| <b>Car Driver</b>                                                          | <b>80.7%</b> | <b>2.4</b>                                                | <b>1.6</b>                                                |
| Car Passenger                                                              | 5.2%         | 0.2                                                       | 0.1                                                       |
| Bicycle                                                                    | 1.4%         | 0.1                                                       | 0.1                                                       |
| Pedestrian                                                                 | 7.4%         | 0.2                                                       | 0.1                                                       |
| <b>Total</b>                                                               | <b>100%</b>  | <b>3</b>                                                  | <b>2</b>                                                  |

5.11. As shown in **Table 5.2**, it is predicted that there would be up to 3 two-way vehicle movements in the weekday AM peak hour and 2 two-way vehicle movements in the PM peak hour from the proposed residential scheme. This would result in 1 vehicle movement every 20 - 30 minutes during the peak hours which is not a significant traffic volume.

5.12. It is also expected that the proposed development would remove the HGV / larger vehicle traffic that currently could operate and be stored at the site.

5.13. It is therefore considered that there will be no detrimental impact upon the local highway network when viewed against the extant site operation.

## **6. Summary and Conclusions**

- 6.1. Bluecrest Land (1) Ltd has instructed Ardent Consulting Engineers to provide transport and infrastructure support for the proposed redevelopment at Land West of Tuthill House, Kelshall Tops, Therfield, Hertfordshire.
- 6.2. This proposed development is for 3 no. detached houses, provided with the following mix of units:
- 1 x 3-bedroom house;
  - 1 x 4-bedroom house; and
  - 1 x 5-bedroom house.
- 6.3. The planning application for the proposed scheme is submitted to NHDC as the local planning authority. HCC is the local highway authority responsible for roads in the village and surrounding area.
- 6.4. This submission follows refusal of a previous application for 3 no. residential units (planning application ref. 21/03533/FP). The application was refused in February 2023 and dismissed at appeal in February 2024 (ref. APP/X1925/W/23/3324095). In response to the refusal, the applicant is seeking permission by making amendments that are believed to address the Inspector's comments.
- 6.5. No technical objection was raised by NHDC or HCC in respect of transport for the previous scheme at the application stage. Likewise, the Inspector found that the site access point and the site's location for housing were suitable and sustainable.
- 6.6. The site is located on the western edge of the village of Therfield, between the towns of Royston and Baldock. Its surrounding area is predominantly residential and agricultural.
- 6.7. The site is located within walking distance of local services such as a school, pub / restaurant, recreational grounds, cricket club and places of worship.
- 6.8. There is limited footway provision within the village, which is entirely typical of a village setting. The surveyed low traffic volumes and speeds, and rural / residential

**July 2024**

character of Therfield, are conducive to walking and cycling along the lane. Also, accident records show that the local highway network does not have an accident problem.

- 6.9. Vehicular access to the development is proposed to be taken from the existing access point, albeit amended to suit its residential use. The change in site use is not expected to intensify the use of the junction and as a result the access point is considered appropriate. HCC has previously raised no technical objection in respect of the access through the previous application.
- 6.10. It is proposed to provide a 2m wide pedestrian link at the eastern boundary of the site, to provide a direct access to PROW footway no. 34. This route will provide a connection towards local amenities and bus stops within the village centre for pedestrians.
- 6.11. The site is within walking distance of facilities within the village, and so is suitable site for residential development in accordance with the objectives of the NPPF, which recognises that opportunities to maximise sustainable transport solutions will vary between urban and rural areas.
- 6.12. The modest number of vehicle movements generated by the development scheme will have a negligible impact on the surrounding highway network. This is not considered to be a "severe" impact. Furthermore, the change of use would remove the ability of the site to be operated for agricultural storage and HGV traffic that currently could occur through its extant planning use.
- 6.13. Refuse collection is to occur from Kelshall Tops with a bin collection point provided within 10m of the kerbside. This has previously been discussed and agreed with Officers of both HCC and NHDC. Emergency vehicles are able to enter the site and get within 45m of dwellings.
- 6.14. The proposed parking provision is provided in accordance with adopted minimum standards. With such provision, the local network would not be used for overspill parking and no related highway safety issues are expected to occur.

6.15. Having fully considered highways/transport matters, we consider that planning permission for the proposed development at the site should be granted.

## OVERVIEW

A 7-day automatic traffic count on West of Access, commencing Tue 19 Nov 2019, recorded a total of 5,698 vehicles. The posted speed limit of 30mph was exceeded by 0.0% of vehicles, and the seasonally adjusted, combined AADT value is 938 (see Equipment & Methodology below).

### COMBINED

|                                            |                |
|--------------------------------------------|----------------|
| <b>Total recorded volume</b>               | <b>5,698</b>   |
| <b>Avg daily volume (based on 7 days)</b>  | <b>814.0</b>   |
| <b>Average daily speed (7 days)</b>        | <b>31.9mph</b> |
| <b>Average daily 85%ile (7 days)</b>       | <b>37.5mph</b> |
| <b>AADT (annual average daily traffic)</b> | <b>938</b>     |

|                                                     |                |
|-----------------------------------------------------|----------------|
| <b>Avg weekday volume (Mon-Fri, 24hrs)</b>          | <b>877.8</b>   |
| <b>Avg weekday speed (Mon-Fri, 24hrs)</b>           | <b>32.2mph</b> |
| <b>Avg 12hr weekday volume (Mon-Fri, 0700-1900)</b> | <b>747.2</b>   |
| <b>Avg 12hr weekday speed (Mon-Fri, 0700-1900)</b>  | <b>32.0mph</b> |

The combined summary on the left shows the total volumes, average speeds, AADT and 85%iles recorded in both directions from all the recorded data. Speeding vehicles are defined as those travelling 31mph and above.

The summaries below provide directionalised details including speeding percentages and weekday daytime details.

## DAILY SPEEDS

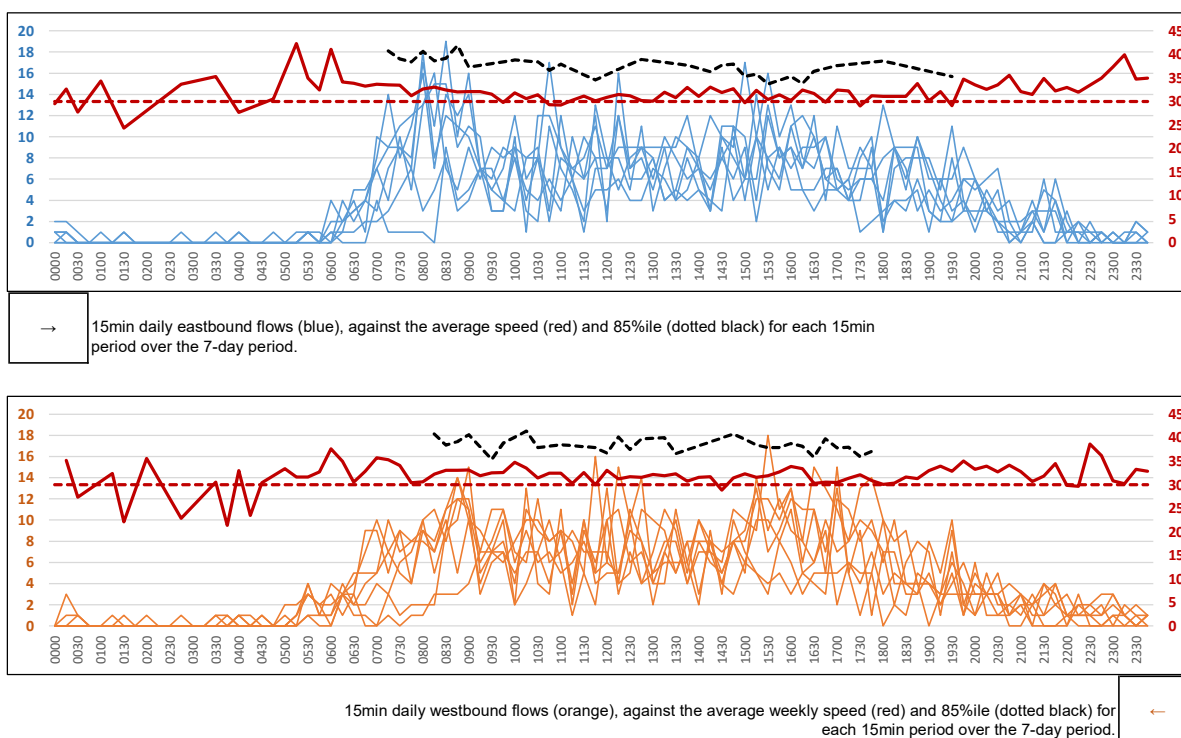

Average daily speeds (solid thin colours) and 85%ile (dashed black) compared against 30mph posted speed limit (dashed red). The 85%ile is the speed at which 85% of all vehicles are observed to travel under free flowing conditions. A minimum of ten vehicles per speed bin is required for this calculation, hence the overnight low-volume 85%ile values may be zero.

The peak average eastbound daytime speed was 37.4mph at 14:45 on Thu 21 Nov, whilst the peak average westbound speed was 42.6mph at 10:00 on Thu 21 Nov (based on 15min averages between 0700 & 1900).

## HOURLY VOLUMES

Average daily eastbound and westbound volumes by class (condensed to the AQMA scheme), including 12hr totals for 0700-1900 and overall average percentages. Calculated from all available data over 7 days.

## CYCLE PROVISION

The diagram compares total daily traffic flow (vertical axis) against the average daily 85th percentile speed (horizontal axis) to demonstrate cyclist and vulnerable user considerations.

The guidelines are based on the Sustrans Design Manual (Apr 2014); Understanding User Needs, part 2.

Valid 85th percentiles are required to plot the graph.

# METHODOLOGY

## Equipment & methodology

Automatic traffic counts are undertaken using a pair of pneumatic tubes installed securely across the carriageway, one metre apart, recording air pulses to determine vehicle speed, class and volume. The ATC equipment generally remains in place for a consecutive seven day period, and the data analysed post-survey.

In queuing conditions, the accuracy of ATC recording equipment will reduce as follows;

- 20 – 30mph: potential reduction of 9% accuracy in volume values
- 10 – 20mph: potential reduction of 26% accuracy in volume values
- 00 – 10mph: potential reduction of 39% accuracy in volume values

These figures are based on multiple ATC results compared against accepted reference values from resilient manual counts.

AADTs are calculated using the seasonal COBA methodology; DMRB Vol. 13, Pt 4:

## Weather & environmental

Inclement conditions during winter months or outbreaks of unseasonable weather may affect survey data collection. This can result in distorted traffic flows or unusable data and should be considered prior to survey approval. Although forecast checks are made prior to the survey commencing, we cannot be held responsible for the forecast accuracy.

| 9     | ART5    | 5 axle articulated     |                            |              |
| 10    | ART6    | 6+ axle articulated    |                            |              |

## Equipment damage & failure

Although checked intermittently the equipment remains unmanned for much of the duration of the survey, and can potentially be interfered with, vandalised, damaged or stolen and we cannot be held responsible for any periods where data has not been captured.

The equipment is located in accordance with the details provided by the client and A-T-R cannot be held responsible for the accuracy of the data or loss of equipment due to theft and vandalism.

## Roadworks & events

Where possible, roadworks checks are made 10 days before, and 48 hours before, the survey commences. Additionally, influencing major local events are also monitored, covering the immediate vicinity of the surveys and any routes likely to affect the outcome of the survey.

## Vehicle classifications

Vehicles recorded by the ATC are placed into one of ten classes based on axle spacing and pattern. This scheme is based on the AustRoad 94 algorithm and modified for UK traffic, referred to as ARX. The table on the left aligns the ARX classifications with the COBA Chapter 8 (Vol 13, Sec 1) classifications.

Under adverse conditions the accuracy of ATC classifications will deteriorate and an appropriate link count should be used for validation.

## Disclaimer

Although every attempt is made to achieve accuracy, we may not be held liable for errors of fact or interpretation.

## DAILY SPEEDS

### EASTBOUND →

### WESTBOUND ←

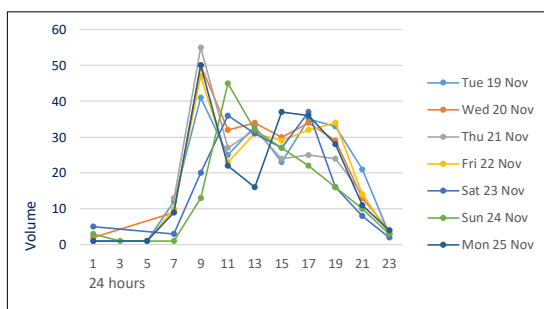

Average daily speeds (solid thin colours) and 85%ile (dashed black) compared against 30mph posted speed limit (dashed red). The 85%ile is the speed at which 85% of all vehicles are observed to travel under free flowing conditions. A minimum of ten vehicles per speed bin is required for this calculation, hence the overnight low-volume 85%ile values may be zero.

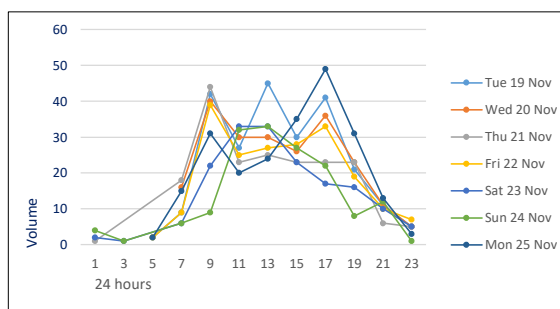

The peak average eastbound daytime speed was 35.7mph at 07:15 on Tue 19 Nov, whilst the peak average westbound speed was 41.1mph at 07:15 on Sun 24 Nov (based on 15min averages between 0700 & 1900).

## HOURLY VOLUMES

Average daily eastbound and westbound volumes by class (condensed to the AQMA scheme), including 12hr totals for 0700-1900 and overall average percentages. Calculated from all available data over 7 days.

## CYCLE PROVISION

The diagram compares total daily traffic flow (vertical axis) against the average daily 85th percentile speed (horizontal axis) to demonstrate cyclist and vulnerable user considerations.

The guidelines are based on the Sustrans Design Manual (Apr 2014); Understanding User Needs, part 2.

Valid 85th percentiles are required to plot the graph.

# METHODOLOGY

## Equipment & methodology

Automatic traffic counts are undertaken using a pair of pneumatic tubes installed securely across the carriageway, one metre apart, recording air pulses to determine vehicle speed, class and volume. The ATC equipment generally remains in place for a consecutive seven day period, and the data analysed post-survey.

In queuing conditions, the accuracy of ATC recording equipment will reduce as follows;

- 20 – 30mph: potential reduction of 9% accuracy in volume values
- 10 – 20mph: potential reduction of 26% accuracy in volume values
- 00 – 10mph: potential reduction of 39% accuracy in volume values

These figures are based on multiple ATC results compared against accepted reference values from resilient manual counts.

AADTs are calculated using the seasonal COBA methodology; DMRB Vol. 13, Pt 4:

## Weather & environmental

Inclement conditions during winter months or outbreaks of unseasonable weather may affect survey data collection. This can result in distorted traffic flows or unusable data and should be considered prior to survey approval. Although forecast checks are made prior to the survey commencing, we cannot be held responsible for the forecast accuracy.

| 10    | ART6    | 6+ axle articulated    |                           |                            |

## Equipment damage & failure

Although checked intermittently the equipment remains unmanned for much of the duration of the survey, and can potentially be interfered with, vandalised, damaged or stolen and we cannot be held responsible for any periods where data has not been captured.

The equipment is located in accordance with the details provided by the client and A-T-R cannot be held responsible for the accuracy of the data or loss of equipment due to theft and vandalism.

## Roadworks & events

Where possible, roadworks checks are made 10 days before, and 48 hours before, the survey commences. Additionally, influencing major local events are also monitored, covering the immediate vicinity of the surveys and any routes likely to affect the outcome of the survey.

## Vehicle classifications

Vehicles recorded by the ATC are placed into one of ten classes based on axle spacing and pattern. This scheme is based on the AustRoad 94 algorithm and modified for UK traffic, referred to as ARX. The table on the left aligns the ARX classifications with the COBA Chapter 8 (Vol 13, Sec 1) classifications.

Under adverse conditions the accuracy of ATC classifications will deteriorate and an appropriate link count should be used for validation.

## Disclaimer

Although every attempt is made to achieve accuracy, we may not be held liable for errors of fact or interpretation.

Warnings and notes:

In order to protect against disclosure of personal information, records have been swapped between different geo amounts. Small counts at the lowest geographies will be most affected.

Census 2021 took place during a period of rapid change. We gave extra guidance to help people on furlough and we are unable to determine how furloughed people followed the guidance. Take care when using this data for planning quality considerations in our <https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/methodology>

|    | GM GREATER MANCHESTER          | 1 days |
| 09 | NORTH                          |        |
|    | DH DURHAM                      | 2 days |

*This section displays the number of survey days per TRICS® sub-region in the selected set*

#### Secondary Filtering selection:

*This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.*

Parameter: Number of dwellings  
 Actual Range: 10 to 432 (units: )  
 Range Selected by User: 6 to 432 (units: )

Parking Spaces Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

##### Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/11 to 06/06/19

*This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.*

##### Selected survey days:

|           |        |
|-----------|--------|
| Monday    | 5 days |
| Tuesday   | 3 days |
| Wednesday | 5 days |
| Thursday  | 4 days |
| Friday    | 2 days |

*This data displays the number of selected surveys by day of the week.*

##### Selected survey types:

|                       |         |
|-----------------------|---------|
| Manual count          | 19 days |
| Directional ATC Count | 0 days  |

*This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.*

##### Selected Locations:

|                                          |    |
|------------------------------------------|----|
| Edge of Town                             | 14 |
| Neighbourhood Centre (PPS6 Local Centre) | 5  |

*This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.*

##### Selected Location Sub Categories:

|                  |    |
|------------------|----|
| Residential Zone | 15 |
| Village          | 3  |
| No Sub Category  | 1  |

*This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.*

Secondary Filtering selection:

Use Class:

C3 19 days

*This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.*

Population within 1 mile:

|                  |        |
|------------------|--------|
| 1,000 or Less    | 1 days |
| 1,001 to 5,000   | 4 days |
| 5,001 to 10,000  | 3 days |
| 10,001 to 15,000 | 7 days |
| 15,001 to 20,000 | 1 days |
| 20,001 to 25,000 | 1 days |
| 25,001 to 50,000 | 2 days |

*This data displays the number of selected surveys within stated 1-mile radii of population.*

Population within 5 miles:

|                    |        |
|--------------------|--------|
| 5,001 to 25,000    | 2 days |
| 25,001 to 50,000   | 3 days |
| 50,001 to 75,000   | 4 days |
| 75,001 to 100,000  | 5 days |
| 125,001 to 250,000 | 1 days |
| 250,001 to 500,000 | 3 days |
| 500,001 or More    | 1 days |

*This data displays the number of selected surveys within stated 5-mile radii of population.*

Car ownership within 5 miles:

|            |         |
|------------|---------|
| 0.6 to 1.0 | 6 days  |
| 1.1 to 1.5 | 13 days |

*This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.*

Travel Plan:

|     |         |
|-----|---------|
| Yes | 1 days  |
| No  | 18 days |

*This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.*

PTAL Rating:

|                 |         |
|-----------------|---------|
| No PTAL Present | 19 days |
|-----------------|---------|

*This data displays the number of selected surveys with PTAL Ratings.*

| Total Rates:  |          |             | 3.411     |            |             | 3.573     |          |             | 6.984     |

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is:  $COUNT/TRP*FACT$ . Trip rates are then rounded to 3 decimal places.
