Air Source Heat Pump Compound
Design & Access Statement

Dated: 28/6/24 (v01)

Design & Access Statement

Park Drive Health Centre Air Source Heat Pump Compound

This Design & Access Statement is in relation to the installation of new fenced compound for the proposed new air source heat pump that is to serve the Park Drive Health Centre.

General Statement

Park Drive Health Centre is a NHS out patient and day centre managed by the Hertfordshire Community NHS Trust.

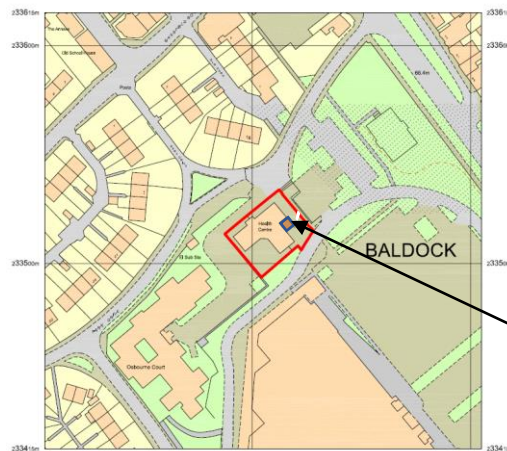

Design Statement

The proposed compound is to provide a secure and safe area adjacent to the plant room and main entrance.

The compound will be enclosed behind the current boundary wall, but will also sit partially upon the wall.

The compound will be formed using a perforated metal fence system, with a secured access gate adjacent to the plant room entrance.

The proposed compound will not affect pedestrian or vehicular access to and from the Park Drive Health Centre.

Compound location
