

Eco Sustainable

Made from sustainable resources, CorkSol exterior coatings are energy-saving and environmentally responsible. The cork used in our products contributes significantly to CO2 absorption and the battle against climate change.

Thermal Performance

The natural thermal performance of the cork in CorkSol can reduce heat loss by up to 30%. Our coatings are proven to be seven or eight times more insulating than traditional lime/sand renders.

Weatherproof

With a 25 year manufacturer's warranty and an ability to deal with anything the British weather can throw at it, an investment in SprayCork coating will perform for decades, keeping your walls dry and warm.

No More Unsightly Cracks
