Good afternoon Chau and Andy

Following our phone conversation earlier I made a site visit the concerns if the bridge access were to be out of action for a prolonged period would be:

- Access to the properties would be very difficult if we were to have to use the footpath access rom Chaucer Way, it would delay care for any patient by quite a period if we had to walk through the footpath with equipment and then to get the patient to the ambulance. Unlike the Fire Service who have a team of people on their vehicles we at most only have 2 and we may have to use a second resource if we need to take a patient out on a stretcher to Chaucer Way
- If we had to access from Chaucer way our crews would have to be able to find the correct footpath and then the residents houses in Mill Lane all of this in the dark would be quite time consuming before reaching the patient
- If an option was possible to have at least a temporary footbridge in place so we are able to gain access from the main road that would by far be a better option

Please let me know if you need anything further from us

Regards

Steve
