Hardstanding

Unsealed Hardstanding Surface Construction

- Hardstanding footprint excavated to 190mm depth
- Lay geotextile membrane to suppress weed growth. Not to be visible above ground.
- Lay 150mm depth of machine-compacted type 1 granular sub-base. Incorporate a 1:40 camber to allow surface water to drain away from the building.
- Lay 40mm depth of machine-compacted, well-graded recycled aggregate (6mm to dust) as surface dressing. Incorporate a 1:40 camber to allow surface water to drain away from the building.
