TREE REPORT

Address

Springwood
Kimpton Road

Welwyn
AL6 9NN

Assessment notes

On June 14th, 2024, we were requested to inspect a TPO Oak tree that is located on the client's garden. The client would like to have the tree removed. This tree's positioning is leaning heavily over two gardens. There are obvious signs of decay at the base of the tree, with a few snapped dead limbs. The tree is being suffocated by the vast amount of ivy and the client is concerned that if left it will cause damage to the two fences.
