Subject: Planning Consultation 25/02064/OP at Land Adjacent To 10 Hambridge Way
Pirton Hertfordshire

Good afternoon all

Regarding the planning consultation as the subject. I do have a comment to make from a waste management and collection perspective.

As per the map within this application and more specifically the properties to the West and the North West of the map. Within these parking areas under the assumption the properties are presenting their bins on the property's boundary has the condition been met that a refuse collection vehicle can comfortably and safely reach these properties to collect and return their refuse

containers. Considering that they could have to travel no further than 10 metres on foot to collect a bin.

Overall, has the same tracking been provided for the site overall showing that a refuse collection vehicle can drive throughout the whole site.

Thank you.

Kind regards
