

E21-012

✓ **Slide**

Sliding develops spatial awareness and sense of balance. Furthermore, the core muscles are trained when sitting upright going down.

✓ **Illustrations**

Transparent panels allows interaction and communication with others on the ground.

✓ **Experience**

While the children play and have fun, their skillsets develop from many different types of play; physical, social and cognitive.

CREATIVE

Joy of creating: co-creation and experimenting with materials

Warranty and materials

Designed to last, we offer a wide range of materials and the best warranty in the business.

Connectors

We pay very special attention to our connectors. Composed of aluminum or polyamide, the composition ensures a longevity in time.

Posts

Our main posts are available in 2 different finishes giving you the opportunity to select your preferred look and quality: 1. Hot dip galvanized steel. 2. Steel post with powder-coated top finish. These both options guarantee an exceptional lifetime of the play equipment structure and low maintenance for the customer.

Screws

Taking into consideration the high quality standards we choose the best quality screws available on the market.

Panels and Flooring

Our Panels are made of HPL or PETG and the flooring is made from plywood. These materials are extremely resistant to vandalism and usage and they have a high-grade UV protection for external use. The play aspect will be conserved in time.

Slide

Our slides are made of Polyester or polyethylene. Our know-how in rotation molding allows us to design slides that are very safe for the children yet they remain fun and fast for children of all ages.

Soft foam activities

Because kids enjoy themselves without any restraints in our play equipments and because safety is our priority, all foams and vinyls of our play-values respect the global norms and regulations to the highest level when it comes to materials used in play equipments.

Thank You !
