Dear William,

Re: Single storey rear extension and insertion of front door and window to existing side elevation | 6 Bury End Pirton Hitchin Hertfordshire SG5 3QB

ARCHAEOLOGICAL IMPLICATIONS

Thank you for consulting us on the above application.

The site lies within an Area of Archaeological Significance, as identified in the Local Plan. This notes the medieval settlement of Pirton. The Historic Environment Record (HER) notes that number 6 is Listed as having architectural and historic significance (LB 1103186, and dates from the eighteenth century or earlier (HER31354). A watching brief to discharge a planning condition for 16/02150/1HH (extension) carried out by North Herts Archaeological Society in 2017 found part of a floor of chalk rubble which is thought to be the floor of a medieval or post medieval building (HER31353).

I believe that the proposed development should be regarded as likely to have an impact on heritage assets of archaeological interest and I recommend that the following provisions be made, should you be minded to grant consent:

1. the archaeological monitoring of all groundworks related to the development, including foundation trenches, service trenches, hard landscaping, and all other ground impact, including a contingency for the preservation or further excavation of any remains encountered;
2. the analysis of the results of the archaeological work with provision for the subsequent production of a report and an archive, and the publication of the results;
3. such other provisions as may be necessary to protect the archaeological interests of the site;

I believe that these recommendations are both reasonable and necessary to provide properly for the likely archaeological implications of this development proposal. I further

believe that these recommendations closely follow the policies included within Policy 16 of the National Planning Policy Framework. In this case three appropriately worded conditions on any planning consent would be sufficient to provide for the level of investigation that this proposal warrants. I suggest the following wording:

A *No demolition/development shall take place/commence until an Archaeological Written Scheme of Investigation has been submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of archaeological significance and research questions; and:*

- 1. The programme and methodology of site investigation and recording*
- 2. The programme for post investigation assessment*
- 3. Provision to be made for analysis of the site investigation and recording*
- 4. Provision to be made for publication and dissemination of the analysis and records of the site investigation*
- 5. Provision to be made for archive deposition of the analysis and records of the site investigation*
- 6. Nomination of a competent person or persons/organisation to undertake the works set out within the Archaeological Written Scheme of Investigation.*

B *The demolition/development shall take place/commence in accordance with the programme of archaeological works set out in the Written Scheme of Investigation approved under condition (A)*

C *The development shall not be occupied/used until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis and publication where appropriate.*

If planning consent is granted, I will be able to provide detailed advice concerning the requirements for the investigations, and to provide information on professionally accredited archaeological contractors who may be able to carry out the necessary work.

Please do not hesitate to contact me should you require any further information or clarification.

Yours sincerely,

Andy Instone
