To whom it may concern

Report on two trees at Crabtree House, Crabtree Lane, Pirton

Tree1: the conifer has a pronounced lean towards the road, the root system is above ground and is showing some rot and structural damage. I advise total removal.

Tree2: a leylandii by the garage is in poor condition and shows signs of stress due to age. The root system is damaging the pavement and boundary wall and causing slight cracking of the garage wall. I advise removal, particularly as the tree is close to a footpath and children's play area.

My client plans to plant new trees to replace both these.
