

SPECIFICATION NOTES - REFER ALSO TO THE TENDER DOCUMENT.

1.0 Setting out

1.1 Planting shall be set out exactly as shown on the drawing, and measured from existing fixed points. Curved beds shall be set out using pins driven into the ground using two pointed stakes and a line bobbin, or with one marker point. The junction between corner and curved beds shall be cut to form a smooth arc using a line bobbin. Check that all setting out conforms to the plan before calibration and planting works are carried out. Failure to do so may result in rejection of the work by the landscape architect and may require amendment at the contractor's expense.

1.2 Planting beds shall be a minimum of 1 metre wide, except where there is insufficient space, due to the constraints of walls and path edges, and their foundations. With narrow beds between walls/fences and path edges, ensure that the bed has space free from concrete paving before planting. If a bed is wider with concrete paving, then the landscape architect shall contact the site manager or landscape architect to determine if footings are excessive and can be reduced or else, the bed can be paved. The width of all beds will be checked by the landscaping contractor and where the width is not as shown, the contractor shall re-cultivate them to the specified width at its own expense.

2.0 Ground preparation

2.1 Pre-planting herbicide application-Apply by suitable spraying equipment, an approved translocated systemic herbicide to the manufacturers' instructions and to 1987 Control of Pesticides Regulations and 2020 COSHH Regulations on all beds except those which are both road free and are to receive aggressive street mulch. Spray herbicide if any weeds are present. If no weeds are showing but planting is delayed, spray after one month following cultivation, to allow dormant seeds to germinate. All spraying shall be carried out by skilled and qualified contractors, using protective clothing in suitable weather (no wind and no spray damage caused by spray drift). From correct usage or spillage, shall be notified at the contractor's own cost. Do not spray near a water body. Repeat as necessary to ensure complete kill and use of all weed resistant from site.

2.2 Carry out the following works to the existing topsoil on site to ensure it conforms to BS 3882:2015, being free from silt larger than 50m diameter, concrete, all roots, wire, brick, and have less than 20% clay. Allow for replacement of herbicide and mulch. Fertilise with 10g per meter square of slow release fertiliser, in accordance with the manufacturer's instructions. For beds less than 5 metres in width, use over thoroughly or machine release soil to a depth of 500mm, ensuring that the subgrade and topsoil are completely broken up and free draining, allowing any compaction. For beds greater than 5 metres in width, break up the subgrade and topsoil using a tractor mounted subsoiler or ripper at 500mm centres to a depth of 500mm except where there are services, or within 10 metres of tree stems or 3 metres of existing hedges. Do not cut areas where roads greater than 10m diameter are encountered.

2.3 Delimitate before submitting a tender, the extent of support from the site manager with ground preparation: removal of all existing beds to reveal a level 60mm below adjacent grass or paved surfaces, within 400/200mm of edges to ensure bark or wood chip mulches are retained. Where grass is proposed adjacent to paving, then the soil level shall be flush with the adjacent paved surface to receive rain water run off. The landscape contractor is responsible for ensuring that the final ground conforms to the specification even where the developer's action: main contractor has failed to supply and/or topped to the required level. The landscape contractor shall allow for adjustment of levels as specified above, including for regrading substrate and topsoil. Where beds are existing, ensure that topsoil is greater to the specified levels below pavement & grass surfaces within 400mm of the edges of the bed. That the topsoil is free from roots and bark or wood chip mulch so that mulch does not get laid on to pavements and also to allow surface water to drain from paths on to planted areas.

2.4 Spreading ground that is shown to be turfless where there is paving adjacent to it should be to the level of the grass areas shall be graded to finish flush with the finished pavement level to allow surface water to drain from pavements to soft areas. Soil of grass areas should therefore never be proud of paved areas. Soil levels more than 10 mm below pavement edges will cause mower damage on cutting.

2.5 Imported topsoil (where specified and sanctioned by the employer for making up ground, shall conform to BS 3882: 2015, and be free from roots over 50mm diameter, concrete, all roots, wire, brick, and have less than 20% clay. Such soil shall be cultivated as set out above. Representative samples shall first be approved by the landscape architect before being supplied. No imported soil shall be supplied to site without a written instruction.

3.0 Planning

3.1 All planting must be carried out in accordance with the tender document, and accompanying drawings. Refer to the tender document for the preparation of existing topsoil and required depths for planting, turfing, and trees, and also for contractual maintenance requirements.

3.2 No modifications will be accepted without the prior agreement of the landscaping architect. The contractor shall replace or correct any error at the time any work starts, species or variety of plant which has not been specified on the planting plan and schedule, unless the prior written agreement, a substitution has been agreed by the landscaping architect. All plants shall be to size specified in the schedule of plants and associated notes. (2L pots are 17cm diameter and 15cm deep, 3L pots are 22cm diameter and 15cm deep, 4L pots are 28cm diameter and 22cm deep, 5L pots are 33cm diameter and 15cm deep, 6L pots are 40cm diameter and 30cm deep, 8L pots are 50cm diameter and 40cm deep, 10L pots are 55cm diameter and 50cm deep) The soil shall be checked on site to ensure compliance with those pots and where needed checks are supplied on the site which are not fully given to the pot e.g. a 5L pot plant recently planted into a 3L container. All plants, which possess a height and spread in accordance with the plant schedule. Anything less than 10% National Plant Specification standards for each species and pot size will be rejected. Plant stock shall be healthy, healthy, disease free, not pot bound, borer or sprayed. There shall be a minimum of 5 weeks per species. This specification is the minimum standard required and any stock falling below this standard, in the sole opinion of the landscaping architect, will be rejected and shall be fixed and replaced at the contractor's expense.

3.3 All shrubs, herbaceous plants, whips and transplants shall be retained in or planting with 50 litres square roots. These shall be watered in with 50 litres per tree pot. Water treatment during the contract period at weekly intervals with 30 litres of water per tree position.

3.4 Proposed feathered trees to be true to the species, variety and size as specified on the planting plan, to mature 12m x 100mm diameter, chestnut side above ground dimension to be 1/3 the height of the tree, stakes to be driven vertically and 1/4 inch apart or rubber, with spacing details, all positioned 25mm maximum from the top of the pot.

3.5 Proposed standard trees to be true to the species, variety and size as specified on the planting plan, to mature 20m x 120mm long, 100mm diameter, chestnut stakes, above ground dimension to be 1/3 the height of the tree, stakes to be driven vertically and 1/4 inch apart or rubber, with spacing details, all positioned 25mm maximum from the top of the pot.

3.6 Turf to be of cultivated grade. The contractor shall replace at once any turf rejected by the landscape architect at its own cost, ensure that the turf is laid flat and is free from hollows, lumps and bumps, cracks or brown or dead patches or other defects and that the turf is well watered before being laid and again after laying. Turf areas shall be kept at least 100mm high and will be established. Access shall be only with timber scaffold jacks to prevent compaction.

3.7 Set drying cutting shrubs or well rooted, with "T" written after the director's name, shall be trained to the wallface with heavy duty, plastic coated garden wire. Training wire shall be attached vertically to the wallface by means of 120mm long stainless steel eye screw fittings. Position 10m x 200mm from ground, and 10m, 200mm from top of the wallface, and string the wire tightly between the fittings. Train the plants to the wire with plastic coated garden wire tags.

3.8 Training varieties of climber, with "T" written after the director's name in specially prepared or ground into beds shall be trained to wallface fences by mounting separate trellis panels 1.5 x 1.5m generally and 1.5 x 1.5m for corners or where space is restricted, include for allowing any panels for location where walls or fences are lower than 1.2m. Trellis panels to be well secured using non staining screws 120mm long by 10mm approx, incorporating 50mm wide wood spacing blocks to ensure that the panel is mounted sufficiently far from the wall to allow leafing of stems. Ensure that all trellis is pressure impregnated with a non phthalate preservative and then treated with a dark brown non phthalate preservative wood stain. Ensure that the trellis is not in contact with the ground. Train the climbing shrub to the trellis with plastic coated garden wire tags.

3.9 Climbers specified outside proposed shrub beds shall have specially prepared director pots. Climber pots shall be 400mm x 400mm and 400mm deep (minimum size) and be supplied with topsoil from site (if otherwise agreed). Ensure the base of the pot is thoroughly broken up and free draining before back filling with topsoil. Ensure no damage to buildings and services, and make good all structures and surfaces disturbed. Fertilise with 50g of slow release fertiliser. Water with 20 litres of water per director pot.

4.0 Mulch

4.1 Supply and spread outside biodegradable street mulch over planting beds, previously cultivated, graded and finished topsoil before planting, and lay down a minimum of 500mm layers, (100mm at edges) and beds less than 1m wide. Paving this mulch is essential to prevent flaps of material becoming exposed. Refer to the specification for biodegradable street mulch on site.

4.2 Following planting, supply and spread evenly bark mulch to a depth of 50mm evenly spread over all planted areas. Street mulch beds shall be no higher than 15mm below pavement or grass beds, 300-500mm of bed edges, to avoid any spillage onto pavements or lawns. N.B. no substitution of mulch type will be acceptable. It is essential to have a rock-free, large perforated brown wood chip to reduce weed growth, reduce wind blow and prevent break down and settling.

5.0 BS codes

5.1 All workmanship and materials shall conform to the following codes:-

5.1.1 General: Landscape operations (including hard surfaces) - BS 4428:1988.

5.1.2 Trees in relation to construction- BS 5837:2012 and BS 5849:1999, BS 3988:2010 (recommendations for tree work).

5.1.3 Nursery stock in accordance with latest horticultural trade association nursery stock specification entitled "National Plant Specification 2017".

5.1.4 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.5 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.6 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.7 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.8 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.9 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.10 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.11 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.12 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.13 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.14 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.15 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.16 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.17 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.18 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.19 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.20 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.21 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.22 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.23 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.24 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.25 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.26 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.27 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.28 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.29 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.30 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.31 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.32 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.33 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.34 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.35 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.36 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.37 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.38 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.39 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.40 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.41 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.42 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.43 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.44 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.45 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.

5.1.46 Nursery stock - Specification for forest trees, BS 3959:1999, Nursery stock - Specification for forest trees, BS 3959:1999.
