

Good afternoon

I do not appear to have been consulted on the original 24/01761/FP application. Looking at the submitted documents it is not clear where the bat and swift features are intended to go as the Preliminary Ecological Advice Letter (Condition 3e) does not provide detail. The so called 'integrated' swift box is not an integrated box at all but one which can be retrofitted as would need to be the case with 81a being an existing property.

Diagram 2: Example of integrated swift box.

Considering the urban nature of the development area and the fact that it was a brownfield site however I do feel that the addition of landscaping will be beneficial and the information provided sufficient to allow condition 5: (Landscape and Ecological Management Scheme) to be discharged.

Kind regards

Liz Anderson CEnv MCIEEM
