

Original Image of back of house

Replacing the rear door with a wooden one so I can keep this detail

Current rear door

Proposed Rear door

Would like approval for the following 3 styles of door, as they will be reclaimed/purchased via an auction site, please let me know if any of these styles are not suitable, the door would function as a stable door.

Material : Real Wood door

The door finish will be painted as it is external facing but also in keeping with the original style of the house.

I have no knowledge of previous colours the door may have been painted but would like to paint it either black or yellow (as per the current door)

This is the most similar to the style shown on the original drawing

This style is more in keeping with a traditional cottage door, similar to the current yellow door (part glazed)

Current Rear Porch for removal, please see slide 1 for original house plan

I believe there is no previously approved planning application for the structure.
