

Design & Access Statement

This scheme has been proposed as there are some minor internal redecoration works being undertaken and the existing signs, due to their condition/age, do not support the development.

Sign A is a new pictorial to be installed on a new Gallow style bracket with drop panel and linolites, clamped to the wall. The new pictorial will replace the existing double legged post on the left side entrance to the car park. This sign will enhance visibility for the property.

Sign B is two new brass entrance lanterns to replace the existing lanterns in the same location. As this is a like for like replacement in terms of size and material, we would anticipate no issues with sign B.

Sign C is two new brass wall lanterns to replace the existing lanterns closer to the entrance. These wall lights will provide safe illumination to the entrance doorway, to provide a safe passage for customers as they enter or leave the premises. As this is a like for like replacement in terms of size and material, we would anticipate no issues with sign C.

Sign D is eleven new led floodlights. The floodlights will be angled toward the building to create a warm, inviting glow. The new lighting will also highlight architectural features of the building.

Sign E is a new brass lantern to the underside of the porch. This is to replace the existing lantern. As this is a like for like replacement in terms of size and material, we would anticipate no issues with sign E.

Overall, we have designed a new signage scheme based on the style and locations of the existing signage. The new decorations will enhance the appearance of the pub and the signs themselves will replicate the impact of the existing signs.
