Dear Ms Vicki Woods

Re : Planning Permission for cladded shipping container for storage use – Baldock Road Royston
Planning Ref : 25/02015/FP

Thank you for your letter dated 8 September 2025 asking for comments on this application by 1 October 2025. The landowners (Trustees) and the land managers (Conservators) have met with members of Royston Archery club to discuss this proposal. This letter is in **support of the application.**

The land on which this storage will be put is common land known in the register as CL92 – Therfield Heath.

On that basis, any planning permission granted should contain an advisory note that, unless exempted, **a common land consent for works will also be needed.** That said, such consents are usually granted where the works are in support of a traditional use of the common and the Conservators recognise archery to be a traditional use.

The Trustees and Conservators also recognise that target bosses and their stands are too large to be transported to and from site and therefore are supportive of the Archery Club's need for on-site storage.

When consulted by the Archery club, in person and by email, the Conservators gave views on the size and location of the container, and its look and feel. Our comments, suggestions and requirements are reflected in this application.

We are grateful you sought our input.

Yours sincerely,

Clive Hall

Chair of The Conservators of Therfield Heath and Greens
