

- Application Boundary
- 2km Study Area
- Local Authority Boundary
- Viewpoint Locations
- Zone of Theoretical Visibility
- Area of Visibility

NOTES:
1. Zone of Theoretical Visibility has been generated using LiDAR Composite First Return 2022 1m digital surface model (DSM) data which takes account of the screening effects of vegetation, buildings and other structures.
2.ZTV generation has allowed for the curvature of the earth and light refraction.
3.ZTV has been generated based upon an observer eye height of 1.6m above ground level.
