Tesup Horizontal Wind Turbine Generator 10KW / hour output 240 KWH daily which is enough for domestic needs for a small residential dwelling. It is a 2025 US design stocked and supplied in the UK.

It can be mounted on a pole of any height, we think 3m is maximum we will need which keeps the blade rotation (1.15 radius) under 4.5m This is the only model Tesup produce and Andrew / Richard are happy to order one once planning permission is granted.
