

This architectural cross-section drawing shows a building with a gabled roof. The main structure has a large, hatched interior space. To the right, a smaller structure is attached, featuring a lower roofline and a window. The drawing is a technical representation of the building's internal structure and roof profile.

This architectural elevation drawing shows a building facade with a light-colored, vertically-ribbed metal roof. The main wall is white. On the left, a brick chimney is visible. The facade features three openings: a multi-paned window on the left, a central door with a transom, and a double-paned window on the right. A dark horizontal band runs above the door and the right window. The drawing includes dashed lines for roof pitch and a ground line at the bottom.
