Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

1. Scaffolding: Erect scaffolding around the perimeter of Wellington House to ensure safe access to the roof for the duration of the work.
2. Roof Stripping: Carefully strip off all existing slates from the roof, setting aside any slates that are reusable. Remove the existing felt and battens, and dispose of them responsibly.
3. Dormer Windows: Remove all existing Velux windows and the two front dormers. The dormers will be rebuilt and installed as like-for-like replicas to maintain the historical integrity of the building.
4. Roofing Materials: Supply and install new breathable felt and new battens. Perform new lead work in valleys and abutments to ensure proper waterproofing and longevity.
5. Installation: Install the new (like-for-like) dormers and Velux windows. Reuse the set-aside slates where possible, and supplement with reclaimed slates to match the existing roof. Cement ridge tiles will be reinstalled.
6. Cleanup: Remove all waste materials from the site and ensure the area is left clean and tidy upon completion of the work.

Details of the pre-application advice received

Response received from Tricia Craggs via email, regarding information to repair the roof and dormer windows is as follows:

Thank you for your enquiry.

As the building is listed any changes to roofing materials will require an application for listed building application. If you were using reclaimed like for like slate tiles it could be classified as a repair but we would need to see a sample of the tile.

As for the dormer windows if you are replacing them it would need to be like for like too and subject to a listed building application.

Hope this helps.
