

**Ordinance Survey Plan
Published 1994**

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the time adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey was established and the first 1:10,000 scale maps were used to update the 1:10,000 scale maps. The published date of the maps often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 1999

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from planar data which has been projected to a datum of 1970. The data is highly detailed showing buildings, roads, tracks, and paths. Road names are also included together with the relevant road number and classification. Boundary information depicted includes county, unitary authority, district, civil parish and constituency.

10k Raster Mapping

Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from plan data which was digitised from original maps produced between 1870 and 1970. The data is highly detailed showing buildings, roads, railways, field boundaries, as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

VectorMap Local

Published 2021

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced at OS's VectorMap Local, a scale of 1:10,000, and are the most detailed mapping product available for Great Britain that has been designed specifically for digital mapping. OS VectorMap Local is derived from large-scale information supplied at 1:250 scale (covering major towns and cities) 1:2500 scale (smaller towns, villages and developed rural areas) and 1:10,000 scale (mountain, moorland and river estuary areas).

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:250,000 scale was adopted for mapping urban areas and by 1886 it covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

The diagram shows a 10x10 grid of cells. The horizontal axis is labeled A1 through A10 from left to right. The vertical axis is labeled A1 through A10 from bottom to top. A central 3x3 sub-grid, covering cells A7 to A9 on both axes, is enclosed by a thick black border. Within this 3x3 sub-grid, the central cell A8 is enclosed by a pink border. All other cells in the grid are outlined with a thin black border.

Large-Scale National Grid Data

Published 1993

Source map scale - 1:1,250

Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey Information on Microfilm') in 1992, and continued to be produced until 1999. The maps were the first of their kind, being the first to provide detailed topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.
