Description of Proposed Works

Please describe the proposed works

The proposed development consists of the following elements:

Single-Storey Side Extension

Construction of a single-storey side extension extending approximate 1700mm from the original external wall of the property. The extension will provide additional internal living space and will be designed to match the existing dwelling in materials and appearance. The extension will have a maximum height of approximate 4,100mm from the existing ground level. The roof will be pitched ensuring a cohesive design.

Garage Conversion to a Habitable Room

The existing garage will be converted into a habitable room, with internal works including insulation, flooring, and new window. The external appearance will be altered to incorporate a new window in place of the garage door, designed to match the existing dwelling.

Raised Decking (400mm High, 4000mm Deep)

Construction of raised decking at the rear of the property, extending 4,000mm from the back wall. The decking will be approximately 400mm high, designed to provide level access to the garden, as the ground level is raised at the rear of the property. The deck will be constructed using timber material.
