Subject: Re: Greggs pod erection planning (Case Ref: CH16364)

Dear Chris

I would like a swifter response as the Letchworth District councillors are meeting this Thursday with regards to this planning application. This application has been illegal and they have broken the law with disregard towards signage from the council that was put up! From the start Letchworth planning officers have not stopped this! Even though myself and my husband informed them of many facts where a normal tenant would never ever got away with an erection if a building like this under a MIG planing application! It is diabolical that these fat cats like Welcome Break can pursue illegally matters for their own benefit with the backing of councillors which are paid out of tax payers money and our council tax and do not back the paying tenants! I truly believe this has been a non negotiable one sided crude erection with no safety measures in place and horrific consequences to a major road being the A1 southbound. A road that has a maximum 70mph speed limit. I would like to hear from you and if you can visit the site and myself (07748106938) I would really appreciate your help In this matter.

Kind regards

Sheryl Ruggieri
