

Officer Liz Anderson – Ecologist
Date 11/06/2026

Ref: 26/01126/FP
Att: Melissa Tyler

Unit 8 , Baldock Industrial Estate, Baldock, Hertfordshire, SG7 6NG

Erection of no.2 industrial units with associated access, parking, landscaping and biodiversity enhancements following demolition of existing industrial building.

Consultee comments;

Thank you for consulting me, having looked at the submitted documents I would have no ecological objection to the proposal.

The Small Sites Metric provided identifies the site biodiversity baseline as 0.048 habitat units and the post-development habitats of the site are valued at 0.08 habitat units and 0.17 hedgerow units thereby meeting the mandatory requirement for 10% BNG.

I note 120m² of other neutral grassland of moderate condition is proposed post development but the location of this is not clear on the plans. Even if this can be accommodated on site I think modified grassland would be a more realistic habitat to create and manage. The applicant can detail this at discharge of condition stage.

The case officer should note Biodiversity Gain condition wording should be added to the decision notice, the biodiversity gain condition is a pre-commencement condition having its own separate statutory basis and is deemed to apply to every planning permission granted for the development of land in England. To ensure the applicant is clear about this distinction the biodiversity gain condition should not be included in the list of conditions imposed in the written notice when granting planning permission but should remain separate.

Biodiversity Net Gain

*The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for the development of land in England is deemed to have been granted subject to the condition “(the biodiversity gain condition)” that **development may not begin unless:***

- (a) a Biodiversity Gain Plan has been submitted to the planning authority, and*
- (b) the planning authority has approved the plan.*

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan if one is required in respect of this permission would be North Herts Council.

There are statutory exemptions and transitional arrangements which mean that the biodiversity gain condition does not always apply.

Based on the information available this permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.
