

ENERGY RATINGS

Current Building Regulations (Part L 2010) require all domestic replacement windows to be rated at 1.6Wm²k or below. As 25% of the heat within most homes escapes through the windows, it's easy to see why more and more people are opting for A-Rated windows.

The insulating glass unit used by Emplas has annealed Low E for the inner pane and float for the outer pane.

LICENCE NUMBER AND TEST RESULTS

Both QS70 & QC70 windows have been tested by the BFRC and achieved the figures in the table below. If you require our licence number for Fensa, Certass, or any other regulatory body, please quote licence number KM594781.

WINDOW	ENERGY RATING BAND	RATING INDEX (kWh/(m ² yr))	G W	V W (W/(m ² K))	DOUBLE GLAZED
QS02 /QC02 (60mm)	A	8	0.45	1.3	28mm
