

This architectural elevation drawing shows a two-story house with a gabled roof and two chimneys. The house features a mix of window styles, including a large multi-paned window on the upper floor, a smaller multi-paned window on the lower floor, and a bay window on the right side. The entrance is marked by a small porch with a door. The drawing uses hatching to indicate different materials or textures on the walls and roof.

This is a black and white architectural elevation drawing of a two-story house. The house features a gabled roof with a central chimney. The facade is textured, possibly representing stucco or stone. There are several windows: a large multi-paned window in the center of the upper floor, a smaller multi-paned window to its left, and a row of three windows (two multi-paned, one narrow) on the lower floor. A central door with a transom is located on the lower floor. A small porch is visible on the right side of the house. The drawing includes horizontal lines indicating levels and a ground line at the bottom.
