Dear Kerry

Thank you for your email. In terms of the additional information:

- I confirm that the existing aperture is 1200 x 1200mm
- I attach a section detail showing applied glazing bars. Whilst the section shows a 24mm system, I confirm that a 16mm system will be fitted. Please note that applied glazing bars have been previously agreed on replacement windows for this property, for example, the kitchen window shown in attachment 1. They achieve the same visual outcome while maintaining significantly better insulation, which is the whole point of the window replacement
- I agree the updated description as in your email below.

Please note that First Stage Approval has been received from LGCHF.

Thank you
Clive Mitchell
