

Hi Paul,

Please find attached the updated Addendum to the ADAS Arboricultural Method Statement (dated 26 June 2025), prepared in response to the recent consultee comments on our application to discharge condition 21 (Ref. 24/01923/DOC).

The AMS review was undertaken on Rev R of the General Arrangement. The General Arrangement approved under the extant Non Material Amendment application (Ref. 25/01033/NMA) is Rev U.

The intervening changes to the drawings have been related to alterations to some of the internal equipment and presentational points such as legend consistency. The fence lines which protect trees from damage have not changed. As such the findings of the AMS review are valid.

Kind regards

Anna
