Works within the Root Protection Areas of existing trees

Levels are not to be amended within root protection areas of existing trees to be retained and no grading (increasing or decreasing of levels) is to be carried out. The only exception to this is where existing hard standing is expressly proposed for removal/ replacement, in which case careful hand-digging will be required to take up surfaces and sub-base as per the arboriculturalist's method statement. No-dig construction methods are proposed for all surfacing within the root protection areas of trees. Tree protection and construction methods are to be carried out as per the Arboriculturalist's AIA for required monitoring and reporting measures.

Installation of play equipment near trees to be installed under Arboricultural supervision in accordance with the Arboricultural Method Statement.
