Tree Works Report – Application for Permission to Undertake tree Reduction Works

Address: 8 Wheatfield Crescent, Royston, SG8 7EN

Tree Species: Ash (*Fraxinus excelsior*)

Location: Rear of property, adjacent to Newark Road

Proposed Work:

A crown reduction of approximately 2 to 3 metres from the top of the ash tree, intended to align with the existing reduced trees in adjacent rear gardens along the same avenue.

Condition and Justification:

The ash tree shows signs of slight dieback within the crown, accompanied by small to medium diameter deadwood, some of which has begun to naturally shed. The proposed reduction will improve safety within the property garden, where some of the shedding has already occurred, by reducing the risk of further deadwood or branch failure. Given the tree's position, with branches also overhanging Newark Road—a busy thoroughfare—the reduction will additionally help mitigate the risk of falling debris and enhance safety for road users and pedestrians alike.

Standards and Competency:

All proposed works will adhere strictly to the British Standards (BS3998:2010 - Tree Work Recommendations). The work will be carried out by qualified and experienced tree surgeons, ensuring both the health of the tree and the safety of the public and property with a qualified and experienced tree surgeon.
