

SPECIFICATION NOTES - REFER ALSO TO THE TENDER DOCUMENT.

1.0 Setting out

1.1 Planting shall be set out exactly as shown on the drawing, and measured from existing fixed points. Curved beds shall be set out using steel rollers on the ground using two person stakes and a line between, or with one marker point. The junction between corner and concave corners shall be cut to form a smooth continuous flowing line. Check that all setting out conforms to the plan before calibration and planting works are carried out. Failure to do so may result in rejection of the work by the landscape architect and any expense associated with the contractor's expense.

1.2 All planting beds shall be a minimum of 1 metre wide, except where there is insufficient space, due to the constraints of walls and path edgings and their foundations. With narrow beds between walls/knoes and path edgings, ensure that the bed has space free from concrete edgings before planting. If unable to water with hoses, then the landscape architect shall correct the bed geometry of landscape architect's determine edgings are excessive and can be reduced or else, the bed can be paved. The width of all beds will be checked by the inspecting landscape architect and where the width is not as shown, the contractor shall not cultivate them to the specified width at his own expense.

2.0 Ground preparation

2.1 Preparing herbicide application- Apply by suitable spraying equipment, an approved translocated systemic herbicide to the manufacturers instructions and to 1987 Control of Pesticides Regulations and 2020 COSHH regulations. All beds except those with paths and lawns and are to receive aggressive sheet mulch. Spray immediately if any weeds are present. If no weeds are showing but planting is delayed, spray after one month following cultivation, to allow correct sand to permeate. All spraying shall be carried out by skilled and qualified contractors, using protective clothing, in suitable weather (no wind and no damage caused by spray drift). From recent usage of 2kg soluble wettable at the contractor's own cost. Do not spray near a water body. Repeat as necessary to ensure complete kill and use of all weed material from site.

2.2 Carry out the following works to the existing topsoil on site to ensure it conforms to BS 3882:2015, being free from debris, stones, roots, etc. and is at least 100mm deep. If the topsoil is less than 100mm deep, add a topsoil layer to a depth of 200mm, ensuring that the subgrade and topsoil are completely broken up and free draining, retaining any drainage. For beds greater than 1 metres in width, break up the subgrade and topsoil using a tractor mounted subsoiler or ripper at 500mm centres to a depth of 300mm/400mm where there are services, or within 10 metres of the drains or 3 metres of existing hedging. Do not cut areas where roots greater than 10mm diameter are encountered.

2.3 Determine before submitting a tender, the extent of support from the site manager with ground preparation: ensure soil of all planting beds is a level 60mm below adjacent grass or paved surfaces, with 600/600mm of ridge to ensure back or water off. If the ridge is not as shown, the contractor shall correct it to the level of the ridge. Where grass is present, the contractor shall correct it to the level of the ridge. Where grass is present, the contractor shall correct it to the level of the ridge.

GENERAL NOTES FOR THE DEVELOPER.

6.0 Tree protection
6.1 Any existing trees to be retained, are the responsibility of the main contractor on site who shall take all necessary protective measures, and not in BS 5827:2012 to ensure no damage to stems or roots, to prevent compaction, contamination of soil, root damage, or other damage to the tree. The landscape architect is however responsible for ensuring that neither plant materials or labour are cause of any damage to existing trees, and the employer, the landscape architect, shall ensure that all work is carried out in accordance with the relevant standards and specifications. The contractor shall ensure that all work is carried out in accordance with the relevant standards and specifications. The contractor shall ensure that all work is carried out in accordance with the relevant standards and specifications.

2.4 Specify ground that is shown to be buried where there is a paving adjacent to 1.20m levels of the grass areas shall be graded to finish flush with the finished pavement level at surface water to drain from pavements to sub areas. Sub of grass areas should therefore never be proud of paved areas. Soil levels more than 10 mm below pavement edges will cause mower damage on cutting.

2.5 Imported topsoil (where specified and sanctioned by the employer for making up ground, shall conform to BS 3882: 2015, and be free from roots over 50mm in length and debris over 25mm in size. Such soil shall be cultivated as set out above. Representative samples shall first be approved by the landscape architect before being supplied. No imported soil shall be supplied to site without a written instruction.

3.0 Planting

3.1 All planting must be carried out in accordance with the tender document, and accompanying drawings. Refer to the tender document for the preparation of existing topsoil and required depths for planting, turfing, and trees, and also for contractual maintenance requirements.

3.2 No installation will be accepted without the prior agreement of the inspecting landscape architect. The contractor shall make it clear at the time of any work, size, species or variety of plant which has not been specified on the planting plan and which is not in the prior written agreement. A substitution has been agreed by the inspecting landscape architect. All plants shall be true to the species specified in the schedule of plants and associated notes.
