

Ref Horseshoe Farm 4

Images of the feeble Walnut Tree

Tree seen from London Rd. The three boles can be seen inside the fence. Some of the already 'dropped' branch scars can be seen.

View looking south . The 'lean' on one of the boles can be easily seen. I am concerned this will fall in the road

View looking North along the road. The other, good condition, Walnut tree is visible directly behind the feeble one. The angle of 'lean' is apparent here, too.

View of the feeble Walnut from inside the garden.
