District ref: 25/03129/FP
HCC ref: NH/27639/2025
HCC received: 22 December 2025
Area manager: Manjinder Sehmi
Case officer: Paul Marshall

Location

Fear End, Fears Green, Sandon, Buntingford, SG9 0QY

Application type

Full Application

Proposal

Full Planning Permission : Erection of dwelling and associated works following demolition of existing dwelling

Recommendation

Notice is given under article 22 of the Town and Country Planning (Development Management Procedure) (England) Order 2015 that Hertfordshire County Council as Highway Authority does not wish to restrict the grant of permission subject to the following conditions:

CON1) No development shall commence until a Construction Method Statement has been submitted to and approved in writing by the Local Planning Authority, including elements of the CLOCS standards as set out in the Highway Authority's Construction Management template. Thereafter the construction of the development shall only be carried out in accordance with the approved Plan: The Construction Method Statement shall include details of:

Access arrangements to the site.

Traffic management requirements.

Construction and storage compounds

Cleaning of site entrances, site tracks and the adjacent public highway.

Timing of construction activities (including delivery times and removal of waste) and to avoid school pick up/drop off times.

Post construction restoration/reinstatement of the working areas and temporary access to the public highway.

Where works cannot be contained wholly within the site a plan should be submitted showing the site layout on the highway including extent of hoarding which must be kept within the site boundary, pedestrian routes and remaining road width for vehicle movements

Reason: In order to protect highway safety and the amenity of other users of the public highway and rights of way in accordance with Policies 5, 12, 17 and 22 of Hertfordshire's Local Transport Plan (adopted 2018).

CON2) Prior to the first commencement of the development hereby permitted, a plan for cycle storage is to be provided and be designed in line with design standards contained in Chapter 11 of the Cycle Infrastructure Design' DfT Local Transport Note 1/20 (July 2020). Prior to first occupation the approved design shall be fully implemented and thereafter retained for this purpose.

Reason: To ensure the provision of adequate cycle parking that meets the needs of occupiers of the proposed development and in the interests of encouraging the use of sustainable modes of transport in accordance with Policies 1, 5 and 8 of Hertfordshire's Local Transport Plan (adopted 2018)

HCC as Highway Authority recommends inclusion of the following Advisory Note (AN) to ensure that any works within the highway are carried out in accordance with the provisions of the Highway Act 1980.

AN1) Storage of materials: The applicant is advised that the storage of materials associated with the construction of this development should be provided within the site on land which is not public highway, and the use of such areas must not interfere with the public highway. If this is not possible, authorisation should be sought from the Highway Authority before construction works commence. Further information is available via the County Council website at: <https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/business-and-developer-information/business-licences/business-licences.aspx> or by telephoning 0300 1234047.

AN2) Obstruction of highway: It is an offence under section 137 of the Highways Act 1980 for any person, without lawful authority or excuse, in any way to wilfully obstruct the free passage along a highway or public right of way. If this development is likely to result in the public highway or public right of way network becoming routinely blocked (fully or partly) the applicant must contact the Highway Authority to obtain their permission and requirements before construction works commence. Further information is available via the County Council website at: <https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/business-and-developer-information/business-licences/business-licences.aspx> or by telephoning 0300 1234047.

AN3) Debris and deposits on the highway: It is an offence under section 148 of the Highways Act 1980 to deposit compost, dung or other material for dressing land, or any rubbish on a made up carriageway, or any or other debris on a highway to the interruption of any highway user. Section

149 of the same Act gives the Highway Authority powers to remove such material at the expense of the party responsible. Therefore, best practical means shall be taken at all times to ensure that all vehicles leaving the site during construction of the development and use thereafter are in a condition such as not to emit dust or deposit mud, slurry or other debris on the highway. Further information is available by telephoning 0300 1234047.

AN4) Gravel / shingle driveways: Where loose gravel or shingle is used, a suitable measure to prevent material spilling onto the road/footpath/verge must be installed. It is an offence under section 148 of the Highways Act 1980 to deposit debris onto the public highway, and section 149 of the same Act gives the Highway Authority powers to remove such material at the expense of the party responsible. Further information is available by telephoning 0300 1234047.

AN5) Avoidance of surface water discharge onto the highway: The applicant is advised that the Highway Authority has powers under section 163 of the Highways Act 1980, to take appropriate steps where deemed necessary (serving notice to the occupier of premises adjoining a highway) to prevent water from the roof or other part of the premises falling upon persons using the highway, or to prevent so far as is reasonably practicable, surface water from the premises flowing on to, or over the footway of the highway.

COMMENTS

The proposals are for Full Planning Permission: Erection of dwelling and associated works following demolition of existing dwelling

Context:

Fears Green is an unclassified local access road and provides a local access function in the road hierarchy. Fears Green is highway maintainable at public expense. A 60mph speed limit applies. On Hertfordshire County Council's Place and Movement network Fears Green is classed as P1/M1 (Rural). No reportable highway accidents recorded within the immediate vicinity of the application site (5-year rolling). No Public Right of Way (as shown on the Public Rights of Way Map) directly affects the site or would be affected by the proposal. The county council considers Fears Green not to be a traffic sensitive road.

Policy Review:

The key documents used to assess the application are

- Manual for Streets 2007
- National Planning Policy Framework (July 2021)
- Hertfordshire County Council's (HCC) Local Transport Plan-4 [2018-2031, May 2018]
- Cycle Infrastructure Design Guidance (Department for Transport Local Transport Note July 2020)
- HCC's Place & Movement Planning Design Guidance (adopted in March 2024)

PLANNING HISTORY

The application site previous planning history.

DRAWINGS

The Highway Authority note the submission of materials in support of the planning application, including drawing numbers: 224136-01-PL-002 Rev A, 224136-01-PL-001 Rev B, 224136-01-PL-011, and Planning Statement (Incorporating Sustainability & Energy Statement).

ACCESSIBILITY

'Cycle Infrastructure Design' DfT Local Transport Note 1/20 (July 2020) recommends for cycle parking storage should be 2m (1.8m is acceptable) in length by 0.3m space between cycles. There should be parking for 1 cycle per dwelling. Outside cycle parking should be covered and lockable. The provision of well-located, safe and secure cycle parking for residents and visitors is a key factor in encouraging people to cycle as an alternative to using the private car. Please see condition 2.

PARKING

The site benefits from a generous curtilage that provides ample space for the parking of multiple vehicles. This arrangement ensures that all parking demand generated by the property can be accommodated within the site boundary. Furthermore, vehicles can enter and exit in a forward gear.

ACCESS

The access arrangement is already established and will remain as existing, with no alterations proposed as part of this development. The current configuration has been assessed as suitable for its intended use and continues to comply with relevant highway standards, ensuring safe and efficient operation without the need for modification.

VISIBILITY

As the proposed development does not include any alterations to the existing access arrangements, the current visibility displays at the site entrance remain unchanged.

EMERGENCY ACCESS

Consistent with the National Planning Policy Framework (2023), paragraph 116 (d), applications for development should allow for access by emergency vehicles. Guidance is set out in Manual for Streets (MfS) (6.7.2). HCC's Place and Movement Planning Design Guide (P&MPDG) (Part 2 Chapter 4). Requirements are set out in the Building Regulations: Fire Safety Approved Document B, Vol 1, Dwellings, 2010 (as subsequently amended). Access for a pumping appliance should be provided to within 45m of a single dwelling house (and within 45m of all points within the dwelling house). As far as it can be reasonably ascertained from submitted plans, the proposed development would be within the recommended emergency vehicle access distance from the highway.

REFUSE / RECYCLING

The proposals for recycling bin storage must be in line with Manual for Streets MfS 6.8.9 residents should not be required to carry waste more than 30m and be within 25m of the kerbside/bin collection point.

CONSTRUCTION METHOD STATEMENT (CMS)

It is important that a CMS is provided considering the access is on a 60mph road The statement must have or be shown as a drawing of the construction site and the dedicated areas within. These should include but not limited to, construction parking area, wheel washing, and storage area. See Condition 1 above.

CONCLUSION

Should the LPA be minded to approve the application please note the above conditions and informatives. This level of development is unlikely to generate any extra movements which would ultimately lead to demonstrable harm to the highway network in terms of free flow and capacity, therefore; the highway authority would not wish to restrict the grant of planning permission.

Signed
Paul Marshall
