

Bat Boxes

Made from FSC timber, natural timber bat boxes are solid, high quality and durable and able to provide excellent insulation for roosting bats.

Chavenage Cavity Bat Box

A natural timber bat box designed to provide a roost for a variety of crevice dwelling species including Pipistrelle, Noctule, Leisler's, Natterer's, Daubenton's and Brown Long-eared bats.

Natural timber construction.

Width: 178mm

Height: 425mm

Weight: 1.22kg

Vivara Pro Build-in Woodstone Bat Box

This built-in brick is ideal for bats as a summer habitat, mating habitat, and in mild winters, as winter accommodation. The species that use the built-in brick will depend on the area where it is installed and the species already present.

APPENDIX 6

Hedgehog Log Pile and Gateway Specification

**Gaps between logs
filled with dry leaves
and/or bark/sticks**

**Located within a damp
shady area**

**Vertical logs
placed minimum
10cm depth in soil**

**Rotting wood
preferable**

A good Hedgehog log pile will be placed in a shady spot using logs placed within a pyramid structure. With vertical logs placed into the ground (at a depth of at least 10cm) at either end to prevent logs from falling. Gaps between logs should contain dry leaves, these gaps can also contain bark and/or sticks. The log pile will preferable be placed in a damp location and be kept damp during dry spells to encourage a good invertebrate community for foraging Hedgehogs.

No minimum size required but large enough to attract a good invertebrate population.

**HEDGEHOG LOG PILE
SPECIFICATION**

Hedgehog Gateways

A 13 x 13 cm section cut out at the base of the gravel board or directly into the fence panel creating links between residential gardens and the surrounding landscape.

This will facilitate the dispersal of Hedgehogs and other small animals and enhance the permeability of the new development for wildlife.

Signposting the features seeks to inform residents and aid the features retention and function.

APPENDIX 7

Bird Box Specification

Bird Boxes

These attractive nestboxes are manufactured from WoodStone which is a mix of concrete and FSC certified wood fibres. Unlike a traditional wooden nest box, these boxes will not rot away or deteriorate and are guaranteed for 10 years. This robust material safeguards against attacks from predators such as woodpeckers, cats and squirrels, whilst also providing a well insulated interior with a more consistent internal temperature than an ordinary wooden box. This is especially important during the breeding season and ensures that young birds have a greater chance of survival.

Vivara Pro Seville WoodStone Open Nest Box 32mm

These open nest boxes are suitable for wrens, robins, spotted flycatchers, pied and grey wagtails, song thrushes and blackbirds, and they are available in brown, green or grey to complement both natural woodland and garden settings.
