Scale 1:50

This architectural elevation drawing illustrates a building facade with a mix of existing and proposed features. The upper portion of the facade is composed of horizontal siding, with a central chimney. Below this, a section of the facade is marked as '(Existing)' and features a window with a decorative pediment. To the left, another section is labeled '(Existing)' and shows a window with a pediment. The central part of the facade is a proposed addition, indicated by dashed lines and labeled '(Existing)' for the existing structure it replaces. This section includes a door and several windows, some with decorative pediments. The lower portion of the facade is also marked as '(Existing)' and features a window with a pediment. The drawing includes various annotations: 'RWP' (Right of Way) is marked at the base of the facade, 'DPC' (Damp Proof Course) is indicated at the base of the proposed addition, and 'F.F.L.' (Finished Floor Level) is marked at the top of the facade. The drawing is a black and white line drawing with hatching used to indicate different materials or textures.
