

Cross-section profile of the proposed road junction and access road. The profile shows the existing ground (dashed line) and proposed ground (solid line) elevations. Key features include the PR Highway Boundary, Proposed Carriageway Widening, Existing Carriageway, and Proposed Junction and Access Road. The profile is defined by stationing points: -3.868, -2.350, 0.000, +4.900, and +12.910. The datum is 57.000. The proposed ground elevations are 68.033, 67.532, 67.590, 67.612, 67.435, and 67.465. The existing ground elevations are 68.033, 67.420, 67.590, 67.825, 67.435, and 67.185. A 1.4m embankment is indicated between the PR Highway Boundary and the Proposed Carriageway Widening.

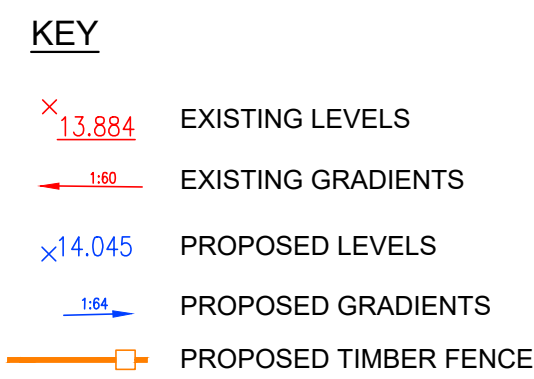

Stationing	Proposed Ground Elevation	Existing Ground Elevation
-3.868	68.033	68.033
-2.350	67.532	67.420
0.000	67.590	67.590
+4.900	67.612	67.825
+12.910	67.465	67.185

The diagram illustrates a cross-section of a proposed highway widening project. The vertical axis represents elevation in feet, with a datum of 67,000. The horizontal axis represents stationing, with key points at -4.198, -2.198, 0.000, and +4.611.

Key Features and Elevation Data:

- PR Highway Boundary:** Indicated by a vertical green line at station -4.198.
- Proposed Carriageway Widening:** Indicated by a vertical blue line at station -2.198.
- Existing Carriageway:** Indicated by a vertical black line at station 0.000.
- 1:4 Embankment:** A slope on the left side of the proposed widening.
- EX GROUND:** The existing ground line, shown as a dashed black line.
- Elevation Points (from left to right):**
 - 68.612 (at station -4.198)
 - 68.525 (at station -2.198)
 - 68.600 (at station -2.198)
 - 68.025 (at station -2.198)
 - 68.080 (at station 0.000)
 - 68.200 (at station +4.611)
 - 68.090 (at station +4.611)
 - 67.8 (at station +4.611)
