

Customer Address:
Peter Nash
89 Pixmore Way
Letchworth Garden City
Hertfordshire
SG6 3TP

For: Multiple Tree Works with Green Waste Processing

Item	Description of Work
1	T1: Three 9-meter-tall mature, multi-stemmed and previously pollarded Poplar Tree (Populus) Trees to undergo a crown reduction of 1-2 meters. These trees dominate the rear boundary and neighbours' gardens as well as the footpath that runs immediately behind them. Any dead or redundant stems to be removed and thinned out. These works will lighten the mass of the trees and remove the risk of breakage due to the 'sail effect' when they are in full leaf, whilst creating more light into the gardens.
2	T2: The 6-meter-tall mature Apple (Malus Domestica) tree to undergo a crown reduction of the 1-meter vertical watershoots along with a light prune to leave it easier to harvest (to be pruned in Winter)
