Dear Sir or Madam,

Planning consultation: Application for approval of reserved matters relating to Phases 2 and 3 being appearance, landscaping, layout and scale pursuant to conditions 7, 8 and 9 of planning permission 21/00434/HYA for the erection of 48 dwellings and associated works

Location: Land North Of Pound Farm London Road St Ippolyts Hertfordshire SG4 7NE

Thank you for your consultation on the above dated 13 January 2025 which was received by Natural England on 13 January 2025

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

NO OBJECTION

Based on the plans submitted, Natural England considers that the proposed development will not have significant adverse impacts on statutorily protected nature conservation sites.

Natural England's generic advice on other natural environment issues is set out at Annex A.

Landscape Advice – Chilterns (AONB)

The proposed development is located partly within/ within a proposed area of search which Natural England is considering as a possible boundary variation to the Chilterns Area of Outstanding Natural Beauty (AONB, known as National Landscape). Whilst this assessment process does not confer any additional planning protection, the impact of the proposal on the natural beauty of this area may be a material consideration in the determination of the proposal.

Natural England considers the Chilterns to be a valued landscape in line with paragraph 180 of the National Planning Policy Framework (NPPF). Furthermore, paragraph 182 of the NPPF states that development in the settings of AONBs should be sensitively located and designed to avoid or minimise impacts on the designated areas. An assessment of the landscape and visual impacts of the proposal on this area should therefore be undertaken, with opportunities taken to avoid or minimise impacts on the landscape and secure enhancement opportunities.

Any development should reflect or enhance the intrinsic character and natural beauty of the area and be in line with relevant development plan policies. In addition, Section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023 places a duty on relevant authorities to seek to further the statutory purposes of the area in carrying out their functions in relation to, or so as to affect, land in an AONB.

An extension to an existing AONB is formally designated once a variation Order, made by Natural England, is confirmed by the Defra Secretary of State. Following the issuing of the designation Order by Natural England, but prior to confirmation by the Secretary of State, any area that is subject to a variation Order would carry great weight as a material consideration in planning decisions.

Other advice

Priority habitats and Species

Priority habitats and Species are of particular importance for nature conservation and are included in the England Biodiversity List published under section 41 of the Natural Environment and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of Special Scientific Interest, on the Magic website or as Local Wildlife Sites. A list of priority habitats and species can be found on [Gov.uk](https://www.gov.uk).

Natural England does not routinely hold species data, such data should be collected when impacts on priority habitats or species are considered likely. Consideration should also be given to the potential environmental value of brownfield sites, often found in urban areas and former industrial land, further information including links to the open mosaic habitats inventory can be found [here](#).

Sites of Special Scientific Interest Impact Risk Zones

The Town and Country Planning (Development Management Procedure) (England) Order 2015 requires local planning authorities to consult Natural England on “Development in or likely to affect a Site of Special Scientific Interest” (Schedule 4, w). Our SSSI Impact Risk Zones are a GIS dataset designed to be used during the planning application validation process to help local planning authorities decide when to consult Natural England on developments likely to affect a SSSI. The dataset and user guidance can be accessed from the data.gov.uk website

Further general advice on the consideration of protected species and other natural environment issues is provided at Annex A.

We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours faithfully

Loz Burridge
