Ben Glover
Senior Planning Officer
North Hertfordshire District Council
Council Offices
Letchworth Garden City
SG6 3JF

Dear Mr Glover

Reference: 25/01708 Outline planning for Land opposite Heath Farm, Briary Lane, Royston

I am writing to you to object to the above planning application, I have downloaded and examined plans from Gladman yet again and having lived on Echo Hill for nearly 10 years know the site well.

My reasons for objecting are

It is the third attempt at gaining planning permission which was rejected unanimously twice previously and is now outside the Local Plan boundary. There should be a regulation preventing speculative proposals like this from being resubmitted within 10 years once they have been rejected twice.

The plan itself is essentially the same as the second one that was rejected, but North Herts DC have to waste time and resources yet again on a plan that is disingenuous, evasive and wrong in so many respects, but which Gladman assure us they will correct or expand upon at a later date.

It won't work, the nature of the site is such that to accommodate the houses, roads and Suds the amount of spoil arising cannot be incorporated in a couple of bee and butterfly banks, so it will either create an elevated landscape feature above the scarp or have to be removed, lorry load by lorry load through Royston on roads that are already close to gridlock when one section must be closed for maintenance.

The proposed access will seriously impact the residents at 23 and 25 and the assumptions in the degree of slope are questionable, whilst the increased traffic both by construction and new residents will affect all the existing residents on Echo Hill, Sun Hill and Briary Lane with further implications for the town itself.

The preliminary ecological appraisal finds little of note in the invertebrate records beyond *Timarcha tenebricosa*, I had 236 species' records verified on Irecord or with the County Moth Recorder, from one of the gardens backing on to the fields, 24 of which held some conservation status and which individually might not be on a par with the Bloody-nosed Beetle but collectively:

"A robust rule of thumb is that 5-10% of species possessing a formal conservation status indicates a high-quality site" This from Dr Peter Kirby, the author of *Habitat Management for Invertebrates: A practical handbook*, in his summary for a 2018 survey of the Magog Down.

I realise a garden is too small and the fact the records span over 4 years means there is little statistical significance to consider but the quality of the assemblage is still there and largely a result of the proximity of the fields. Many of the species with conservation status were grassland specialists like:

Acronicta psi and *A. rumicis*, the Grey Dagger and Knot Grass moths both found as caterpillars so breeding on site, not just passing by. These are Section 41 species and like *Coenonympha pamphilus* the Small Heath butterfly, they are of principal importance for conserving biodiversity in England and perhaps should not have been so simply sidelined.

Within the Hymenoptera, *Osmia bicolor* and *Ectemnius sexcinctus* are both Nationally Notable B species, the *Osmia* favouring South facing slopes on chalk grassland and *Bombus ruderalis* another NNB species is awaiting verification.

Aphanus rolandri, the only NNA species on the list, is a very distinctive bug and has been expanding its territory of late, it's liking for well drained soil and chalk pits can explain its presence here.

These records and those of the badgers, hedgehogs and skylarks show a much greater diversity than is painted in the application and therefore a much greater loss in terms of biodiversity than could possibly be gained by the on site green space provision, which itself is within 400m of the Therfield Heath SSSI so should not qualify as Suitable Alternative Natural Greenspace.

Much of the application proposals are based on desk studies, and do not account for the topography that is the nature of the site, so cars will be used more than the suggested bikes, those with push chairs and wheel chairs will also struggle and there is no real detail in how access from Echo Hill to the site will be achieved.

I strongly urge the Council to reject this application as they have previously done so, there is little merit in it and even less substance when scrutinised.

I attach the list of records submitted to I Record and the County Moth Recorder to the end of this letter

Yours faithfully

Nicholas Beale

Lepidoptera	Noctuidae	<i>Hadena confusa</i>	Marbled Coronet	22.6.23	R
Lepidoptera	Noctuidae	<i>Mythimna pallens</i>	Common Wainscot	30.6.19	R
Lepidoptera	Noctuidae	<i>Noctua comes</i>	Lesser Yellow Underwing	22.6.19	R
Lepidoptera	Noctuidae	<i>Noctua pronuba</i>	Large yellow underwing	30.6.19	R
Lepidoptera	Noctuidae	<i>Phlogophora meticulosa</i>	Angle Shades	15.8.19	R
Lepidoptera	Noctuidae	<i>Rusina ferruginea</i>	Brown Rustic	22.6.19	R
Lepidoptera	Noctuidae	<i>Shargacucullia verbasci</i>	Mullein Moth	17.6.19	R
Lepidoptera	Noctuidae	<i>Xylocampa areola</i>	Early Grey	29.3.24	R
Lepidoptera	Nymphalidae	<i>Aglais io</i>	Peacock	7.7.20	R
Lepidoptera	Nymphalidae	<i>Aglais urticae</i>	Small Tortoiseshell	26.6.17	R
Lepidoptera	Nymphalidae	<i>Aphantopus hyperantus</i>	Ringlet	29.6.18	R
Lepidoptera	Nymphalidae	<i>Polygonia c-album</i>	Comma	14.6.20	R
Lepidoptera	Nymphalidae	<i>Pyronia tithonus</i>	Gatekeeper	08.8.19	R
Lepidoptera	Nymphalidae	<i>Vanessa atalanta</i>	Red Admiral	17.7.20	R
Lepidoptera	Oecophoridae	<i>Endrosis sarcitrella</i>	White-shouldered house moth	27.9.21	R
Lepidoptera	Pieridae	<i>Anthocharis cardamines</i>	Orange Tip	24.5.20	R
Lepidoptera	Pieridae	<i>Pieris brassicae</i>	Large White	21.5.20	R
Lepidoptera	Pieridae	<i>Pieris napi</i>	Green-veined White	30.5.20	R
Lepidoptera	Pieridae	<i>Pieris rapae</i>	Small White	22.6.20	R
Lepidoptera	Plutellinae	<i>Plutella xylostella</i>	Diamond Back Moth	20.7.20	R
Lepidoptera	Pterophoridae	<i>Amblyptilia acanthadactyla</i>	Beautiful Plume	12.6.20	R
Lepidoptera	Pyalidae	<i>Aphomia sociella</i>	Bee moth	30.6.19	R
Lepidoptera	Satyridae	<i>Coenonympha pamphilus</i>	Small Heath	09.6.20	R S 41
Lepidoptera	Satyridae	<i>Maniola jurtina</i>	Meadow Brown	31.5.20	R
Lepidoptera	Satyridae	<i>Melanargia galathea</i>	Marbeled White	30.6.19	R
Lepidoptera	Sessiidae	<i>Synanthedon formicaeformis</i>	Red-tipped clearwing	9.07.23	R
Lepidoptera	Sphingidae	<i>Deilephila elpenor</i>	Elephant Hawkmoth	30.6.19	R
Lepidoptera	Sphingidae	<i>Macroglossum stellatarum</i>	Hummingbird Hawkmoth	08.6.20	R
Lepidoptera	Sphingidae	<i>Sphinx ligustri</i>	Privet Hawkmoth	30.6.19	R
Lepidoptera	Tortricidae	<i>Agapeta zoegana</i>		25.07.22	R
Lepidoptera	Tortricidae	<i>Argyrotaenia ljungiana</i>		2.5.21	R
Lepidoptera	Tortricidae	<i>Epiphyas postvittana</i>	Light Brown Apple Moth	16.5.20	R
Lepidoptera	Tortricidae	<i>Lozotaenia forsterana</i>		30.5.20	R
Odonata	Aeshnidae	<i>Aeshna mixta</i>	Migrant Hawker	26.7.21	R
Odonata	Coenagrionidae	<i>Coenagrion puella</i>	Azure Damselfly	21.6.20	R
Odonata	Coenagrionidae	<i>Pyrhosoma nymphula</i>	Large Red Damselfly	09.5.20	R
Odonata	Libellulidae	<i>Libellula depressa</i>	Broad bodied chaser	9.6.22	R
Orthoptera	Acrididae	<i>Chorthippus brunneus</i>	Field grasshopper	8.10.22	R
Orthoptera	Tettigoniidae	<i>Leptophyes punctatissima</i>	Speckled Bush-cricket	26.7.19	R
Orthoptera	Tettigoniidae	<i>Metrioptera roeselii</i>	Roesel's Bush-cricket	29.6.23	R
Psocoptera	Stenopsocidae	<i>Graphopsocus cruciatus</i>	Barklouse	4.5.23	R

<i>Mollusca</i>					
Gastropoda	Helicidae	<i>Cepaea nemoralis</i>	Brown-lipped Snail	10.5.20	R
Gastropoda	Helicidae	<i>Cornu aspersum</i>	Garden snail	21.5.20	R
Gastropoda	Limacidae	<i>Limacus maculatus</i>	Irish Yellow Slug	20.5.20	R
R	Recorded	accepted	IRECORD etc,		
-	recorded	Awaiting verification			
This is unlikely to be a complete tally of the conservation status for this list, merely what I as an amateur could find on the internet, there may be more and similarly some may have been reclassified.					
NNA		Nationally Notable A	16 -30 hectads		
NNB		Nationally Notable B	31-100 hectads		
Red l		Red list species	According to NBN Atlas		
S41		Section 41 Species
