Dear Ben,

Re: Battery Energy Storage System (BESS), ground mounted solar farm, associated infrastructure, access and landscaping. | Land South Of A507 Near Cumberlow Green Clothall Road Clothall Hertfordshire

ARCHAEOLOGICAL IMPLICATIONS

Thank you for consulting us on the above application.

The Historic Environment Record (HER) notes that the site lies a few hundred metres to the north of a Roman road (HER4190). It also lies a similar distance to the south of the remains of earthworks (HER6342). These may be associated with the Scheduled Monument (SM10824) of Cumberlow Manor House (HER2359). It also lies in the vicinity of the site of a discovery of a Bronze Age Hoard in 1877 (HER581).

With the above in mind, I believe that the position of the proposed development is such that it should be regarded as likely to have an impact on heritage assets with archaeological interest, I recommend that the following provisions be made, should you be minded to grant consent:

1. the archaeological evaluation, via trial trenching, of the development area, prior to the commencement of any development;
2. such appropriate mitigation measures indicated as necessary by that evaluation. These may include:
 - a. the preservation of any remains in situ, if warranted,
 - b. appropriate archaeological excavation of any remains before any development commences on the site, with provisions for subsequent analysis and publication of results,
 - c. archaeological monitoring of the groundworks of the development (also including a contingency for the preservation or further investigation of any remains then encountered),
 - d. such other provisions as may be necessary to protect the archaeological interests of the site;

3. the analysis of the results of the archaeological work with provision for the subsequent production of a report and an archive, and the publication of the results;
4. such other provisions as may be necessary to protect the archaeological and historic interests of the site.

I believe that these recommendations are both reasonable and necessary to provide properly for the likely archaeological implications of this development proposal. I further believe that these recommendations closely follow the policies included within Policy 16 of the National Planning Policy Framework. In this case three appropriately worded conditions on any planning consent would be sufficient to provide for the level of investigation that this proposal warrants. These are referred to as A, B and C but can be numbered at your convenience. I suggest the following wording:

A No demolition/development shall take place/commence until an Archaeological Written Scheme of Investigation has been submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of archaeological significance and research questions; and:

- 1. The programme and methodology of site investigation and recording*
- 2. The programme and methodology of site investigation and recording, preservation in situ of heritage assets and no dig areas as required by the evaluation*
- 3. The programme for post investigation assessment*
- 4. Provision to be made for analysis of the site investigation and recording*
- 5. Provision to be made for publication and dissemination of the analysis and records of the site investigation*
- 6. Provision to be made for archive deposition of the analysis and records of the site investigation*
- 7. Provision to be made for public outreach and interpretation*
- 8. Nomination of a competent person or persons/organisation to undertake the works set out within the Archaeological Written Scheme of Investigation.*

B The demolition/development shall take place/commence in accordance with the programme of archaeological works set out in the Written Scheme of Investigation approved under condition (A)

C The development shall not be occupied/used until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis and publication where appropriate.

If planning consent is granted, I will be able to provide detailed advice concerning the requirements for the investigations, and to provide information on professionally accredited archaeological contractors who may be able to carry out the necessary work.

Please do not hesitate to contact me should you require any further information or clarification.

Yours sincerely,

Andy Instone
