Dear Tom,

Re: Internal and external alterations to facilitate the change of use and conversion of former White Horse PH to a mixed use comprising a single residential dwelling (Use Class C3), and micropub (Sui Generis). | 22 High Street Kimpton Hitchin Hertfordshire SG4 8RJ

ARCHAEOLOGICAL IMPLICATIONS

Thank you for consulting us on the above application.

The Historic Environment Record notes that the site lies within an Area of Archaeological Significance as identified by the Local Plan. This includes the medieval settlement of Kimpton. It is recorded in Domesday Book as *Kamintone* which means the farmstead of a Saxon named Cyma (HER2695).

The White Horse is Listed Grade II as being of architectural and historic significance and dates from at least the seventeenth century (LB 1347310). It includes a terrace of houses, public house and shop.

I therefore believe that the proposed development is such that it should be regarded as likely to have an impact on heritage assets of archaeological interest and I recommend that the following provisions be made, should you be minded to grant consent:

- 1) The archaeological historic building recording of the historic buildings, prior to any development taking place;
- 2) The archaeological building recording of all interventions to the fabric of those buildings in areas where such works might reveal information relating to the development of the building, and for the purpose of recording any original historic features (etc.) that may be exposed, this includes the removal of floor surfaces;
- 3) The evaluation, of the proposed development area, prior to development commencing,

4) Such appropriate mitigation measures indicated as necessary by this evaluation. These may include:

- a. the preservation of any remains *in situ*, if warranted,
- b. appropriate archaeological excavation of any remains before any development commences on the site, with provisions for subsequent analysis and publication of results,
- c. archaeological monitoring of the groundworks of the development (also including a contingency for the preservation or further investigation of any remains then encountered),
- d. such other provisions as may be necessary to protect the archaeological interests of the site;

5) The analysis of the results of the archaeological work with provision for the subsequent production of a report and an archive, and the publication of the results;

6) Such other provisions as may be necessary to protect the archaeological and historic interests of the site.

I believe that these recommendations are both reasonable and necessary to provide properly for the likely archaeological implications of this development proposal. I further believe that these recommendations closely follow the policies included within Policy 16 of the National Planning Policy Framework, and relevant guidance contained in the National Planning Practice Guidance, and in the Historic Environment Good Practice Advice in Planning Note 2: Managing Significance in Decision-Taking in the Historic Environment (Historic England, 2015).

In this case three appropriately worded conditions on any planning consent would be sufficient to provide for the level of investigation that this proposal warrants. I suggest the following wording:

A No demolition/development shall take place/commence until an Archaeological Written Scheme of Investigation has been submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of archaeological significance and research questions; and:

1. The programme and methodology of site investigation and recording
2. The programme and methodology of site investigation and recording as required by the evaluation
3. The programme for post investigation assessment
4. Provision to be made for analysis of the site investigation and recording
5. Provision to be made for publication and dissemination of the analysis and records of the site investigation
6. Provision to be made for archive deposition of the analysis and records of the site investigation
7. Nomination of a competent person or persons/organisation to undertake the works set out within the Archaeological Written Scheme of Investigation.

B The demolition/development shall take place/commence in accordance with the programme of archaeological works set out in the Written Scheme of Investigation approved under condition **(A)**

C The development shall not be occupied/used until the site investigation and post investigation assessment has been completed in accordance with the programme set out

in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis and publication where appropriate.

If planning consent is granted, I will be able to provide detailed advice concerning the requirements for the investigations, and to provide information on professionally accredited archaeological contractors who may be able to carry out the necessary work.

I hope that you will be able to accommodate the above recommendations.

Please do not hesitate to contact me should you require any further information or clarification.

Yours sincerely,

Andy Instone
