Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

Replace side window of the front ground floor entrance room. This window is a standard casement design which is not in keeping with the rest of the house. It is single-glazed, offers poor insulation and is prone to rotting. The application is to replace it with a double glazed window which is consistent with the design of the other windows in the house. The window is on the northern side of the house and is not visible from the front.

☒ No

If the answer to any of these questions is Yes, please provide plans, drawings and photographs sufficient to identify the location, extent and character of the items to be removed. Also include the proposal for their replacement, including any new means of structural support, and state references for the plan(s)/drawing(s).

The window to be replaced is on the north facing, side elevation of the house on the ground floor (see attachment 1, circled). It is a standard timber casement, probably installed 40 or more years ago. It is single glazed and offers minimal thermal insulation, is prone to rot and has been repaired many times. Its appearance is not consistent with the windows in the period of the house or with the Heritage Foundation's design principles, and detracts from the building's character.

It is proposed to remove this window and install a new timber window (see drawing in attachment 2) consistent with the other windows on that side of the house and with the design principles. It is of similar type and manufacture as the kitchen window (also indicated in attachment 1) which was approved in May 2008, application 08/00558/1LB, except that it will have no opening top light. The new window will incorporate double glazing (4/16/4) to improve energy conservation which is essential given it is north facing and on the coldest side of the house. No new structural support is required; the replacement will fit the existing masonry opening. Attachment 3 shows photographs of the proposed new window, though in a smaller size (they are made to order and the company only had this size available for illustration purposes). Attachment 4 show the vertical section drawing.
