

Photos Taken 20<sup>th</sup> February 2026

**Photographic Site Survey, Existing (11 Westfield Close, SG5 2HF):**

*Front of House showing Brick and Tile Material, chimney locations, parking space and the size of the gap on the E and S elevations. Also demonstrates neighbours build-above-garage, like our proposed.*

Photos Taken 20<sup>th</sup> February 2026

*Rear of the property, showing the space between boundaries & walls. Height and Size of neighbouring extensions/properties are visible. Alongside the 'cut in' of the house on the RHS, which we are mirroring in our plans. Their main and side/mansard roof ridges will be higher than ours, therefore they will maintain light and the same views as existing, with no blockages. Boundary distance to LHS neighbour is also visible, and is a significant distance away.*

Photos Taken 20<sup>th</sup> February 2026

*Showing 9 Westfield Close's approved extension projection, size and height. In an elevated position compared to 11 Westfield, as the road naturally slopes.*

Photos Taken 20<sup>th</sup> February 2026

*13 Westfield Close clearly visible, along with the large gap between boundaries and side walls. Our proposal is aligned with the projection of no.13, and matches the size of the first storey. That property already projects 4m further back than no. 11 as existing.*

*Our Subservient hipped roof is sympathetic to no.13's roof line/pitch angle.*
